<sup>1</sup> Due to an amendment to section 46f of the German Banking Act ("**KWG**"), which revises the ranking of bank debt in the event of insolvency, the rating agencies have developed a sub-division into 2 rating categories for long-term senior debt previously grouped into a single category.

<sup>2</sup> Designation by Moody's: "Senior senior unsecured bank debt".

<sup>3</sup> Designation by Moody's: "Senior unsecured".

<sup>4</sup> Designation by S&P: "Long-term Senior Unsecured".

<sup>5</sup> Designation by S&P: "Long-term Senior Subordinated".

<sup>6</sup> Designation by Fitch: "Long-term Issuer Default-Rating".

<sup>7</sup> Not applicable to Long-term Non-Preferred Senior Unsecured Notes.

### *Ratings*

The Notes to be offered may be rated or unrated. Where an issue of Notes is rated, its rating may not be the same as the rating as set out above and such rating may be disclosed in the relevant Final Terms.

A rating is not a recommendation to buy, sell or hold Notes and may be subject to suspension, reduction or withdrawal at any time by the assigning rating agency.

Fitch's long-term credit ratings are set up along a scale from AAA, AA, A, BBB, BB, B, CCC, CC, C, RD down to D. Fitch uses the intermediate modifiers "+" and "-" to denote relative status within the categories from AA to B. Fitch has also the possibility for guidance (termed "on watch") as to whether a rating is likely to be upgraded (positive), downgraded (negative) or uncertain (evolving). Outlooks are used to indicate the direction of a rating as the indication could be positive, negative, stable or evolving. Fitch's short-term ratings reflect a bank's vulnerability to default in the short term at the levels F1+, F1, F2, F3, B, C, RD and D.

Moody's appends long-term obligation ratings at the following levels: Aaa, Aa, A, Baa, Ba, B, Caa, Ca and C. To each generic rating category from Aa to Caa Moody's assigns the numerical modifiers "1", "2" and "3". The modifier "1" indicates that the bank is in the higher end of its letter-rating category, the modifier "2" indicates a mid-range ranking and the modifier "3" indicates that the bank is in the lower end of its letter-rating category. Moody's also has the option of adding further guidance (referred to as "under review") as to whether a rating is likely to be upgraded (possible upgrade), downgraded (possible downgrade) or uncertain (direction uncertain). Outlooks are assigned indicating the direction of any pressure. Characteristics are positive, negative, stable and developing. Moody's short-term ratings are opinions of the ability of issuers to honor short-term financial obligations and range from P-1, P-2, P-3 down to NP (Not Prime).

S&P assign long-term credit ratings on a scale from AAA, AA, A, BBB, BB, B, CCC, CC, C, SD to D. The ratings from AA to CCC may be modified by the addition of a "+" or "-" to show the relative standing within the major rating categories. S&P may also offer guidance (termed a "credit watch") as to whether a rating is likely to be upgraded (positive), downgraded (negative) or uncertain (developing). Outlooks are an indicator for the rating direction. S&P uses positive, negative, stable and developing outlooks. S&P assigns short-term credit ratings for specific issues on a scale from A-1+, A-1, A-2, A-3, B, C, SD down to D.

HVB confirms that the information contained in this section "Ratings" has been accurately reproduced and that as far as HVB is aware and is able to ascertain from information published by Fitch, Moody's

and S&P, respectively, no facts have been omitted which would render the reproduced information inaccurate or misleading.

The ratings were prepared by subsidiaries of these rating agencies. These subsidiaries, Standard & Poor's Credit Market Services Europe Ltd. (German branch) with its registered office in Frankfurt am Main, Moody's Deutschland GmbH with its registered office in Frankfurt am Main and Fitch Ratings GmbH with its registered office in Frankfurt am Main, are registered under Regulation (EC) No. 1060/2009 of the European Parliament and of the Council of 16 September 2009 on credit rating agencies, as amended and are included in the list of registered credit rating agencies published on the website of the European Securities and Markets Authority at <https://www.esma.europa.eu/supervision/credit-rating-agencies/risk>

### *Definitions of Ratings*

The following sections show the detailed rating definitions of the rating agencies.

#### **Moody's**

##### *Global Long-Term Rating Scale*

A	Obligations rated A are judged to be upper-medium grade and are subject to low credit risk.
Baa	Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

##### *Global Short-Term Rating Scale*

P-1	Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.
-----	--

#### **Fitch**

##### *Long-Term Rating Scale*

A	'A' ratings denote expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.
BBB	'BBB' ratings indicate that expectations of default risk are currently low. The capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity.

##### *Short-Term Rating Scale*

F2	Good intrinsic capacity for timely payment of financial commitments.
----	--

#### **Standard & Poor's**

##### *Long-Term Issue Credit Ratings*

BBB	An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.
BB	Obligations rated 'BB', 'B', 'CCC', 'CC' and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of

	speculation and 'C' the highest. While such obligation will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.
--	---

*Short-Term Issue Credit Ratings*

A-2	A short-term obligation rated 'A-2' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment is satisfactory.

## *Ratings*

A rating is not a recommendation to buy, sell or hold Securities and may be subject to suspension, reduction or withdrawal at any time by the assigning rating agency.

Fitch's long-term credit ratings are set up along a scale from AAA, AA, A, BBB, BB, B, CCC, CC, C, RD down to D. Fitch uses the intermediate modifiers "+" and "-" to denote relative status within the categories from AA to B. Fitch has also the possibility for guidance (termed "on watch") as to whether a rating is likely to be upgraded (positive), downgraded (negative) or uncertain (evolving). Outlooks are used to indicate the direction of a rating as the indication could be positive, negative, stable or evolving. Fitch's short-term ratings reflect a bank's vulnerability to default in the short term at the levels F1+, F1, F2, F3, B, C, RD and D.

Moody's appends long-term obligation ratings at the following levels: Aaa, Aa, A, Baa, Ba, B, Caa, Ca and C. To each generic rating category from Aa to Caa Moody's assigns the numerical modifiers "1", "2" and "3". The modifier "1" indicates that the bank is in the higher end of its letter-rating category, the modifier "2" indicates a mid-range ranking and the modifier "3" indicates that the bank is in the lower end of its letter-rating category. Moody's also has the option of adding further guidance (referred to as "under review") as to whether a rating is likely to be upgraded (possible upgrade), downgraded (possible downgrade) or uncertain (direction uncertain). Outlooks are assigned indicating the direction of any pressure. Characteristics are positive, negative, stable and developing. Moody's short-term ratings are opinions of the ability of issuers to honor short-term financial obligations and range from P-1, P-2, P-3 down to NP (Not Prime).

S&P assign long-term credit ratings on a scale from AAA, AA, A, BBB, BB, B, CCC, CC, C, SD to D. The ratings from AA to CCC may be modified by the addition of a "+" or "-" to show the relative standing within the major rating categories. S&P may also offer guidance (termed a "credit watch") as to whether a rating is likely to be upgraded (positive), downgraded (negative) or uncertain (developing). Outlooks are an indicator for the rating direction. S&P uses positive, negative, stable and developing outlooks. S&P assigns short-term credit ratings for specific issues on a scale from A-1+, A-1, A-2, A-3, B, C, SD down to D.

#### *Definitions of Ratings*

The following sections show the detailed rating definitions of the rating agencies.

#### **Moody's**

##### *Global Long-Term Rating Scale*

A	Obligations rated A are judged to be upper-medium grade and are subject to low credit risk.
Baa	Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

##### *Global Short-Term Rating Scale*

P-1	Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.
-----	--

#### **Fitch**

##### *Long-Term Rating Scale*

A	'A' ratings denote expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.
BBB	'BBB' ratings indicate that expectations of default risk are currently low. The capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity.

##### *Short-Term Rating Scale*

F2	Good intrinsic capacity for timely payment of financial commitments.
----	--

#### **Standard & Poor's**

##### *Long-Term Issue Credit Ratings*

BBB	An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.
BB	Obligations rated 'BB', 'B', 'CCC', 'CC' and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of

	speculation and 'C' the highest. While such obligation will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.
--	---

*Short-Term Issue Credit Ratings*

A-2	A short-term obligation rated 'A-2' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment is satisfactory.
