Subject to the influence of other price influencing factors (such as expected volatility, interest rate, dividend yield, time to maturity), if the price of the Underlying rises, the price of the Security regularly rises. D. RISKS

D.2	Key information on the key risks that are specific to the Issuer	<i>Potential investors should be aware that in the case of the occurrence of one of the below mentioned risk factors the securities may decline in value and that they may sustain a total loss of their investment.</i> • Macroeconomic risk Risks from a deterioration in the macroeconomic development and/or the financial markets and from geopolitical uncertainties. • Systemic risk Risks from disruptions or the functional collapse of the financial system or parts of it. • Credit risk (i) Risks from changes in the credit rating of a contracting party (borrower, counterparty, issuer or country); (ii) Risks from a deterioration of the overall economic situation and negative effects on the demand for credit and the solvency of the borrowers of HVB Group; (iii) Risks from a decrease in value of credit collateral; (iv) Risks from derivative/trading business; (v) Risks from intra-group credit exposures; (vi) Risks from exposures to sovereigns / public sector. • Market risk (i) Risk of potential losses that can arise in response to adverse changes in market prices, other price-influencing parameters or trading-related events; (ii) Risk for trading and banking books from a deterioration in market conditions; (iii) Interest rate and foreign currency risk. • Liquidity risk (i) Risk that the HVB Group will not be able to meet its payment obligations on time or in full; (ii) Risks from the procurement of liquidity; (iii) Risks from intra-group liquidity transfers; (iv) Market liquidity risk. • Operational risk (i) Risk of losses resulting from inadequate or failed internal processes, systems, human errors or external events; (ii) IT risks; (iii) Legal and tax risks; (iv) Compliance risk; (v) Business continuity management risk.
------------	--	--

		• Business risk Risks of losses arising from unexpected negative changes in the business volume and/or margins. • Real estate risk Risk of losses resulting from changes in the market value of the real estate portfolio of HVB Group. • Financial investment risk Risk of losses resulting from fluctuations in the measurement of HVB Group's equity interest. • Reputational risk Risk of negative effects on the income statement caused by adverse reactions by stakeholders due to a changed perception of HVB Group. • Strategic risk (i) Risk that results from management either not recognising early enough or not correctly assessing significant developments or trends in the bank's environment; (ii) Risks arising from the strategic orientation of HVB Group's business model; (iii) Industry specific risk; (iv) Risks arising from a change in HVB's rating. • Regulatory risks (i) Risks arising from changes to the regulatory and statutory environment of HVB Group; (ii) Risks in connection with the International Financial Reporting Standards 9 (IFRS 9); (iii) Risks in connection with potential resolution measures or a reorganisation proceeding. • Pension risk Risk that the pension provider will have to provide additional capital to service the vested pension commitments. • Risks arising from outsourcing activities Cross-risk-type, which affects the following risk types in particular: operational risk, reputational risk, strategic risk, business risk, credit risk, market risk and liquidity risk. • Risks from concentrations of risk and earnings Risks from concentrations of risk and earnings indicate increased potential losses and represent a business-related strategy risk for HVB Group. • Risks from the stress testing measures imposed by ECB The business performance of HVB and HVB Group could be negatively affected in case of a poor stress test performance by HVB,
--	--	--

		HVB Group, UniCredit S.p.A. or one of the financial institutions with which they do business. • Risks from inadequate risk measurement models It is possible that the internal models of HVB and HVB Group could be rated as inadequate following investigations or verification through the regulatory authorities, or that they could underestimate existing risks. • Unidentified/unexpected risks HVB and HVB Group could incur greater losses than those calculated with the current methods or losses previously left out of its calculations entirely.
D.6	Key information on the key risks that are specific to the securities	In the opinion of the Issuer, the key risks described below may, with regard to the Security Holder, adversely affect the value of the Securities and/or the amounts to be distributed under the Securities and/or the ability of Security Holders to sell the Securities at a reasonable price prior to their redemption. • Potential conflicts of interest The risk of conflicts of interest (as described in E.4) is related to the possibility that the Issuer, distributors or any of their affiliates, in relation to certain functions or transactions, may pursue interests which may be adverse to or do not regard the interests of the Security Holders. • Key risks related to the Securities <i>Key risks related to the market</i> Under certain circumstances a Security Holder may not be able to sell his Securities at all or at an adequate price prior to their redemption. Even in the case of an existing secondary market it cannot be ruled out that the Security Holder may not be in a position to dispose of the Securities in the case of an unfavourable development of the Underlying or its components or of a currency exchange rate, e.g. if such development occurs outside of the trading hours of the Securities. The market value of the Securities will be affected by the creditworthiness of the Issuer and a number of other factors (e.g. exchange rates, prevailing interest and yield rates, the market for similar securities, the general economic, political and cyclical conditions, the tradability of the Securities and Underlying-related factors) and may be substantially lower than the purchase price. Security Holders may not rely on being able to sufficiently hedge against price risks arising from the Securities at any time.

		<i>Key risks related to the Securities in general</i> The Issuer may possibly fail to perform its obligations under the Securities in whole or in part, e.g., in case of an insolvency of the Issuer or due to governmental or regulatory interventions. Such risk is not protected by a deposit protection scheme or any similar compensation scheme. The competent resolution authority may apply resolution tools which include, among others, a "bail-in" instrument (e.g., conversion of Securities into equity instruments or write down). Application of a resolution tool may materially affect the rights of the Security Holders. An investment into the Securities may be illegal or unfavourable for a potential investor or not suitable, with regard to his knowledge or experience and his financial needs, goals and situation. The real rate of return of an investment into the Securities may be reduced or may be zero or even negative (e.g., due to incidental costs in connection with the purchase, holding and disposal of the Securities, future money depreciation (inflation) or tax effects). The differential amount may be less than the Issue Price or the respective purchase price and, under certain circumstances, no interest or ongoing payments will be made. The proceeds from the Securities may possibly not be sufficient to make interest or principal payments arising from a financing purchase of the Securities and require additional capital. <i>Risks related to Underlying-linked Securities</i> <i>Risks arising from the influence of the Underlying or its components on the market value of the Securities</i> The market value of the Securities and the amounts payable under the Securities significantly depend on the price of the Underlying or its components. It is not possible to predict the price development of the Underlying or its components in the future. Additionally, the market value of the Securities will be affected by a number of Underlying-related factors. <i>Risks arising from the fact that the observation of the Underlying or its components occurs only at specified dates or times or periods</i> Due to the fact that the observation of the Underlying or its components may occur only at specified dates, times or periods, amounts payable under the Securities may be considerably lower than the price of the Underlying or its components may have suggested.
--	--	---

		<i>Risks related to a Strike</i> A strike can lead to the Security Holders participate either to a lesser extent in a favourable performance of the Underlying or its components or to a greater extent in an unfavourable performance of the Underlying or its components. <i>Risks related to a Ratio</i> A ratio may result in the Security being in economic terms similar to a direct investment in the relevant Underlying or its components, but being nonetheless not fully comparable with such a direct investment. <i>Currency and Currency Exchange Rate risk with respect to the Underlying or its components</i> Since the Underlying or its components are denominated in a currency other than the Specified Currency, there is a Currency Exchange Rate risk. <i>Risks related to Adjustment Events</i> Adjustments may have a substantial negative impact on the value and the future performance of the Securities as well as on the amounts to be distributed under the Securities. Adjustment events may also lead to an extraordinary early termination of the Securities. <i>Risks related to structure specifics</i> Because of the leverage typical for the Securities, the performance of the Underlying may have a disproportionately strong adverse effect on the value of the Securities. The time value declines in relation to the time remaining to maturity. In this case the market value of the Securities will fall to zero by the last possible Exercise Date. <i>Risks related to Call Warrants</i> If the price of the Underlying falls, the Security Holders may suffer a total loss of their invested capital. <i>Risks related to Put Warrants</i> If the price of the Underlying rises, the Security Holders may suffer a total loss of their invested capital. <i>Risks related to Call Events</i> Upon the occurrence of a Call Event the Issuer has the right to extraordinarily call the Securities at their market value. If the market value of the Securities at the relevant time is lower than the Issue Price or the purchase price, the respective Security Holder will suffer a partial or total loss of its invested capital even if
--	--	--

		the Securities provide for a conditional minimum payment. <i>Risks related to Market Disruption Events</i> The Calculation Agent may defer valuations and payments and make determination in its discretion acting in accordance with relevant market practice and in good faith. Security Holders are not entitled to demand interest due to such delayed payment. <i>Risks arising from negative effects of hedging arrangements by the Issuer on the Securities</i> The entering or the liquidation of hedging transactions by the Issuer may, in individual cases, adversely affect the price of the Underlying or its components. • Key risks related to the Underlying or its components General risks <i>No rights of ownership of the Underlying or its components</i> The Underlying or its components will not be held by the Issuer for the benefit of the Security Holders, and as such, Security Holders will not obtain any rights of ownership (e.g., voting rights, rights to receive dividends, payments or other distributions or other rights) with respect to the Underlying or its components. Key risks related to currency exchange rates The performance of currency-exchange-rate-linked-Securities primarily depends on the performance of the respective currency exchange rate, which is subject to certain influencing factors. The trading on a global basis almost non-stop in various time zones may lead to different prices in different places, which are not all relevant for the calculation of the Securities. The currency exchange rates displayed on different sources of information may also vary. As a result, a currency exchange rate favourable for the investor might not be used for the calculation or, as the case may be, specification of the Differential Amount. The Securities are not capital protected. Investors may lose the value of their entire investment or part of it.

C.5	Eventuali restrizioni alla libera trasferibilità degli strumenti finanziari	Non applicabile. Non sono previste restrizioni alla libera trasferibilità degli Strumenti Finanziari.
C.8	Descrizione dei diritti connessi agli strumenti finanziari compreso il " <i>ranking</i> " e le restrizioni a tali diritti	Diritto applicabile agli Strumenti Finanziari Gli Strumenti Finanziari, per forma e contenuto, e tutti i diritti ed obblighi dell'Emittente e dei Titolari, sono regolati dalla legge della Repubblica Italiana. Diritti collegati agli Strumenti Finanziari Gli Strumenti Finanziari hanno una scadenza fissa. I Titolari hanno diritto ad un pagamento in denaro correlato alla performance di un Sottostante (come definito sub C.20). Gli Strumenti Finanziari saranno automaticamente esercitati alla Data di Valutazione Finale. (come definita sub C.16). Alla Data di Pagamento Finale (come definita sub C.16), i Titolari degli Strumenti Finanziari hanno il diritto a chiedere il pagamento dell'Importo Differenziale (come definito sub C.15) (il "Diritto di Esercizio"). Gli Strumenti Finanziari non pagano interessi. Limitazione dei diritti Al ricorrere di uno o più eventi di rettifica (inclusi, ma non limitati a,

		modifiche del modo di determinazione e/o pubblicazione del Sottostante o la risoluzione anticipata di derivati connessi al Sottostante) (gli "Eventi di Rettifica") l'Agente per il Calcolo modificherà a agendo nel rispetto delle rilevanti pratiche di mercato e della buona fede i termini e le condizioni di tali Strumenti Finanziari e/o tutti i prezzi dei Sottostanti determinati dall'Agente per il Calcolo sulla base dei termini e le condizioni degli Strumenti Finanziari in modo tale che la posizione finanziaria dei Titolari resti imm modificata nella maggior misura possibile. Al ricorrere di uno o più eventi di riscatto (ad es. se, nell'ipotesi di un Evento di Rettifica, una rettifica si rivelasse impossibile o comunque non ragionevole per l'Emittente e/o per i Titolari di Titoli) l'Emittente può riscattare in via straordinaria gli Strumenti Finanziari e rimborsare gli Strumenti Finanziari al loro Importo di Cancellazione. L' "Importo di Cancellazione" è il loro valore equo di mercato. Gli obblighi del Market Maker sono stabiliti dai regolamenti di Borsa Italiana – SeDeX MTF.

I Covered Warrant Call sono Strumenti Finanziari ai quali "Call" è specificato nell'Allegato alla presente Nota di Sintesi e in cui i Titolari

		partecipano all'andamento del Sottostante. I Covered Warrant Put sono Strumenti Finanziari ai quali "Put" è specificato nell'Allegato alla presente Nota di Sintesi e in cui i Titolari partecipano all'andamento negativo del Sottostante. Soggetto all'influenza di altri fattori che influenzano il prezzo (come la volatilità prevista, il tasso di interesse, il rendimento del dividendo, la scadenza), se il prezzo del Sottostante diminuisce, di regola il prezzo dello Strumento Finanziario aumenta. Soggetto all'influenza di altri fattori che influenzano il prezzo, se il prezzo del Sottostante aumenta, di regola il prezzo dello Strumento Finanziario diminuisce. L' "Importo Differenziale" equivale: - nel caso di Covered Warrant Call all'importo di cui il Prezzo di Riferimento Rilevante (come definito sub C.19) supera lo Strike, moltiplicato per il Multiplo; - nel caso di Covered Warrant Put all'importo di cui il Prezzo di Riferimento Rilevante è inferiore allo Strike, moltiplicato per il Multiplo. L'Importo Differenziale sarà convertito nella Valuta di Emissione prima del pagamento mediante l'applicazione di un Tasso di Cambio FX considerato alla Data di Valutazione FX. 	degli strumenti derivati	corrispondere gli importi maturati presso il Sistema di Compensazione da accreditarsi sui rispettivi conti delle banche depositarie per il trasferimento sui conti dei Titolari. Il pagamento al Sistema di Compensazione manleva l'Emittente dai propri obblighi derivanti dagli Strumenti Finanziari in relazione all'importo di tale pagamento. "Sistema di Compensazione" significa Monte Titoli S.p.A..
C.18	Descrizione delle modalità secondo le quali si generano i proventi degli strumenti derivati	Pagamento dell'Importo Differenziale alla Data di Pagamento Finale.

D.6	Informazioni fondamentali sui principali rischi che sono specifici per gli strumenti finanziari	L'Emittente ritiene che i principali rischi descritti di seguito possono, con riferimento ai Titolari, influenzare negativamente il valore degli Strumenti Finanziari e/o gli importi da distribuire derivanti dagli Strumenti Finanziari e/o la capacità dei Titolari di cedere gli Strumenti Finanziari ad un prezzo ragionevole prima del loro rimborso. • Potenziati conflitti di interesse Il rischio di conflitti di interessi (come descritto sub E.4) è correlato alla possibilità che l'Emittente, collocatori o rispettivi affiliati perseguano, in relazione a talune funzioni o operazioni, interessi che possono o meno essere contrari agli interessi dei Titolari. • Principali rischi correlati agli Strumenti Finanziari <i>Principali rischi correlati al mercato</i> In alcune circostanze un Titolare può non essere in grado di rivendere i propri Strumenti Finanziari ovvero di cederli ad un prezzo adeguato prima del rimborso. Anche nell'ipotesi di esistenza di un mercato secondario non si può escludere che il Titolare possa non trovarsi in grado di cedere gli Strumenti Finanziari in ipotesi di un'evoluzione sfavorevole del Sottostante o delle sue componenti o di un tasso di cambio, ad esempio qualora tale sviluppo si verifichi al di fuori dell'orario di contrattazione degli Strumenti Finanziari. Il valore di mercato degli Strumenti Finanziari sarà influenzato dalla solvibilità dell'Emittente e da ulteriori fattori (e.g., tassi di cambio, interesse attuale e tassi di rendimento, il mercato per strumenti finanziari simili, le generali condizioni economiche, politiche e cicliche, la negoziabilità degli Strumenti Finanziari e dei fattori correlati al Sottostante) e può essere sostanzialmente inferiore al prezzo di acquisto. I Titolari non possono fare affidamento sulla possibilità di tutelarsi in qualsiasi momento dai rischi di prezzo derivanti dagli Strumenti Finanziari. <i>Principali rischi correlati agli Strumenti Finanziari in generale</i> L'Emittente potrebbe non essere in grado di adempiere, in tutto o in parte, ai propri obblighi derivanti dagli Strumenti Finanziari, e.g. in caso di insolvenza dell'Emittente o per effetto di interventi governativi o regolamentari. A fronte di tale rischio non è previsto alcun sistema di garanzia dei depositi né alcun sistema di indennizzo analogo. L'autorità di risoluzione competente potrebbe applicare strumenti di risoluzione che includono, tra gli altri, uno strumento "bail-in" (es. la

		conversione degli Strumenti Finanziari in strumenti rappresentativi o riduzioni di valore). L'applicazione di uno strumento di risoluzione potrebbe influire in modo sostanziale sui diritti dei Titolari degli Strumenti Finanziari. Un investimento negli Strumenti Finanziari potrebbe essere contrario alla legge o non favorevole per un potenziale investitore ovvero inadatto in considerazione della propria conoscenza o esperienza, dei propri bisogni finanziari, dei propri obiettivi e della propria situazione. Il tasso di rendimento reale di un investimento negli Strumenti Finanziari può ridursi a zero ovvero assumere valori negativi (e.g., a causa di costi accessori connessi all'acquisto, alla detenzione e alla dismissione degli Strumenti Finanziari, a future svalutazioni monetarie (inflazione) o ad effetti fiscali). L'importo differenziale può essere inferiore al Prezzo di Emissione o al rispettivo prezzo di acquisto e, in alcune circostanze, non verrà corrisposto alcun interesse né verranno eseguiti pagamenti nel corso del periodo di detenzione degli Strumenti Finanziari. I proventi degli Strumenti Finanziari potrebbero non essere sufficienti a generare interessi o a permettere di eseguire i pagamenti dovuti per effetto dell'acquisto degli Strumenti Finanziari mediante finanziamento richiedendo capitale aggiuntivo. <i>Rischi correlati a Strumenti Finanziari collegati a Sottostanti</i> <i>Rischi dovuti all'influenza del Sottostante o di componenti dello stesso sul valore di mercato degli Strumenti Finanziari</i> Il valore di mercato degli Strumenti Finanziari e gli importi erogabili derivanti dagli Strumenti Finanziari dipendono significativamente dal prezzo del Sottostante o dai componenti dello stesso. L'evoluzione futura del prezzo del Sottostante o di componenti dello stesso non è prevedibile. Inoltre, il valore di mercato degli Strumenti Finanziari sarà influenzato da diversi fattori correlati al Sottostante. <i>Rischi dovuti al fatto che la valutazione del Sottostante o delle componenti dello stesso avviene solo in date, momenti o periodi specificati</i> A causa del fatto che la valutazione del Sottostante o di componenti dello stesso può avvenire solo in date, momenti o periodi specificati, i proventi erogabili derivanti dagli Strumenti Finanziari possono essere considerevolmente più bassi rispetto al prezzo che il Sottostante o componenti dello stesso potrebbero aver suggerito. <i>Rischi correlati allo Strike</i> I Titolari possono partecipare in misura minore ad una performance
--	--	--

		favorevole del Sottostante o di componenti dello stesso o in misura maggiore ad una performance non favorevole del Sottostante o di componenti dello stesso. <i>Rischi correlati ad un Multiplo</i> Un multiplo può fare sì che lo Strumento Finanziario sia analogo, sebbene non del tutto assimilabile, in termini economici ad un investimento diretto nel relativo Sottostante o nelle componenti dello stesso. <i>Rischio Valuta e rischio del Tasso di Cambio con riferimento al Sottostante o a componenti dello stesso</i> Poiché il Sottostante o le componenti dello stesso sono espresse in una valuta diversa dalla Valuta di Emissione, esiste un rischio connesso al Tasso di Cambio. <i>Rischi correlati ad Eventi di Rettifica</i> Rettifiche potrebbero avere un impatto negativo sostanziale sul valore e la futura performance degli Strumenti Finanziari così come sugli importi da distribuire derivanti dagli Strumenti Finanziari. Eventi di rettifica possono inoltre determinare il riscatto straordinario anticipato degli Strumenti Finanziari. <i>Rischi correlati a specificità della struttura</i> A motivo della leva finanziaria tipica degli Strumenti Finanziari, la performance del Sottostante può avere un impatto negativo più che proporzionale sul valore degli Strumenti Finanziari. Il valore nel tempo declina in relazione al periodo residuo alla liquidazione. In questa ipotesi, il valore di mercato degli Strumenti Finanziari scenderà a zero entro l'ultima Data di Esercizio possibile. <i>Rischi correlati a Covered Warrant Call</i> Se il prezzo del Sottostante scende i Titolari possono subire la perdita totale del loro capitale investito. <i>Rischi correlati a Covered Warrant Put</i> Se il prezzo del Sottostante sale, i Titolari possono subire la perdita totale del loro capitale investito. <i>Rischi correlati a Eventi di Riscatto</i> Al verificarsi di un Evento di Riscatto l'Emittente ha diritto di riscatto straordinario degli Strumenti Finanziari al rispettivo valore di mercato. Se il valore di mercato degli Strumenti Finanziari al momento rilevante è inferiore al Prezzo di Emissione o al prezzo di acquisto, il relativo Titolare sarà soggetto ad una parziale o totale perdita del capitale investito nonostante gli Strumenti Finanziari prevedano un pagamento minimo condizionale.
--	--	---

		<i>Rischi correlati a Turbative di Mercato</i> L'Agente per il Calcolo può rinviare date di valutazione e pagamenti ed effettuare valutazioni a propria discrezione agendo nel rispetto delle rilevanti pratiche di mercato e della buona fede. I Titolari non hanno diritto a richiedere interessi per ritardato pagamento. <i>Rischi derivanti da effetti negativi di accordi di hedging da parte dell'Emittente degli Strumenti Finanziari</i> L'ingresso o la conclusione di operazioni di hedging da parte dell'Emittente può, in singoli casi, avere un impatto negativo sul prezzo del Sottostante o di suoi componenti. • Principali rischi correlati al Sottostante o a componenti dello stesso <i>Rischi generali</i> <i>Nessun diritto di proprietà sul Sottostante o su componenti dello stesso</i> Il Sottostante o le componenti dello stesso non saranno detenute dall'Emittente a beneficio del Titolare, e di conseguenza, i Titolari non avranno alcun diritto di proprietà (e.g. diritti di voto, diritti di ricevere dividendi, pagamenti o altre distribuzioni, nonché altri diritti) in relazione al Sottostante o alle componenti dello stesso. <i>Rischi correlati a tassi di cambio</i> La performance di Strumenti Finanziari correlati a tassi di cambio su valute dipende primariamente dalla performance del rispettivo tasso di cambio, che è a sua volta legata a determinati fattori. La negoziazione su base globale quasi non-stop in differenti zone può determinare prezzi diversi in luoghi diversi, non tutti rilevanti per il calcolo degli Strumenti Finanziari. Anche i tassi di cambio riportati in differenti fonti di informazione possono variare. Di conseguenza, un tasso di cambio favorevole per l'investitore potrebbe non essere utilizzato per il calcolo o, a seconda del caso, per le specifiche dell'Importo Differenziale. Gli Strumenti Finanziari non hanno protezione del capitale. Gli investitori possono perdere in toto il proprio investimento o parte di tale investimento.
