Had the aforementioned article not been applied, the leverage ratio of HVB Group as at 31 December 2020 would amount to 4.4% (in accordance with approved consolidated financial statements).

What are the key risks that are specific to the Issuer?

Risks related to the Issuer's financial situation: Risk that HVB Group will not be able to meet its payment obligations on time or in full or to obtain sufficient liquidity when required as well as that liquidity will only be available at higher interest rates, and the risk that the bank will only be able to liquidate assets on the market at a

discount could create liquidity problems for HVB Group and thus could result in a limited ability to fund its activities and meet its minimum liquidity requirements.

Risks related to the Issuer's specific business activities: Risks arising from the normal business activities of HVB Group, which involve credit risk in the lending business, market risk in the trading business as well as risks from other business activities such as the real estate business activities of HVB Group could have an adverse impact on HVB Group's operating results, its assets and its financial situation.

General risks related to the Issuer's business operations: Risks from inadequate or failed internal processes, systems and people or from external events, risks caused by adverse reactions of stakeholders due to their altered perception of the bank, risks from unexpected adverse changes in the future earnings of the bank as well as risks from concentrations of risk and/or earnings positions could result in financial losses, a downgrade of the bank's rating and an increase in the business risk of the HVB Group.

Legal and regulatory risk: Changes of the regulatory and statutory environment of HVB could result in higher capital costs and a rise of costs for the implementation of regulatory requirements. In cases of non-compliance with regulatory requirements, (tax) laws, regulations, statutory provisions, agreements, mandatory practices and ethical standards, the public perception of HVB Group as well as its earnings and financial situation could be negatively affected.

Strategic and macroeconomic risk: Risks resulting from management either not recognising early enough or not correctly assessing significant developments or trends in the bank's environment and risks arising from negative economic developments in Germany and on the international financial and capital markets could have a negative effect on the assets, liabilities, financial position and profit or loss of HVB Group. It can be expected that the global spread of the coronavirus will weigh on global economic growth in the first half of the year. It is also possible that the burden will last longer depending on how the pandemic progresses.

Section 3 – Key information on the Securities

What are the main features of the Securities?

Product Type, Underlying and form of the Securities

Product Type: Call Turbo Open End Securities (Non-Quanto)

Underlying: Volkswagen AG (Vorzugsaktien) (ISIN: DE0007664039)

The Securities are issued as debt instruments in dematerialized registered form pursuant to the Italian Consolidated Law on Financial Intermediation (*Testo Unico della Finanza*). The Securities will be represented by book entry and registered in the books of the Clearing System. The transfer of the Securities operates by registration on the relevant accounts opened in the Clearing System. The international securities identification number (ISIN) of the Securities is set out in Section 1.

Issuance, Nominal Amount and Term

The Securities will be issued on 8 March 2022 in Euro (EUR) (the "**Specified Currency**"), without a nominal amount, as 1,000,000 Certificates. The Securities have an indefinite term. They continue until the exercise of the Exercise Right by the Security Holder or the exercise of the Issuer's Regular Call Right by the Issuer, unless a Knock-out Event occurs. Upon the exercise of such a right, the term of the Securities will end on the respective Exercise Date.

Exercise Right

Subject to the occurrence of a Knock-out Event or unless the Securities are terminated by the Issuer, the Security Holder has the right to demand of the Issuer the payment of the Differential Amount per Security (Exercise Right).

The Exercise Right may be exercised by the Security Holder on each Exercise Date.

The Differential Amount will be calculated by subtracting the Strike from the Relevant Reference Price. The difference will be multiplied by the Ratio.

The Differential Amount will not be lower than EUR 0.-.

Upon the effective exercise of the Exercise Right, the Differential Amount will be paid five Banking Days after the

respective Valuation Date.

Knock-out

Upon the occurrence of a Knock-out Event, the Exercise Right lapses and the Knock-out Amount will be paid for each Security.

The Knock-out Amount will be paid five Banking Days after the day, on which the Knock-out Event has occurred.

A Knock-out Event occurs if starting on the First Trade Date the price of the Underlying at any time is on or below the Knock-out Barrier.

The Knock-out Amount corresponds to EUR 0.-.

Issuer's Regular Call Right

The Issuer may terminate the Securities on any Exercise Date in full but not in part and repay them at the Differential Amount.

Additional definitions and product terms

On the 9 March 2022 the Strike is equal to the Initial Strike. Thereafter, the Strike will be adjusted on any calendar day. In particular, dividend payments of the Underlying as well as the proportionate financing costs of the Issuer are taken into account. The financing costs are determined on the basis of a current market interest rate (Reference Rate) and the applicable Risk Management Fee. As a result, the Strike usually approaches the current price of the Underlying, provided the price of the Underlying does not rise accordingly.

Exercise Date means the last trading day of each month of January, February, March, April, May, June, July, August, September, October, November and December of each year.

Valuation Date means the Exercise Date on which the Exercise Right has been effectively exercised, or the Exercise Date, as the case may be, on which the Issuer has exercised its Regular Call Right.

The Knock-out Barrier is always equal to the Strike.

Relevant Reference Price means the Reference Price of the Underlying on the respective Valuation Date.

Reference Price	Ratio	Initial Knock-out Barrier*	Initial Strike*	Reference Rate	Initial Risk Management Fee*
Closing price	0.1	EUR 100.00	EUR 100.00	EURIBOR1M=	4%

* Values as of 9 March 2022. After this date, the values may be different.

Extraordinary termination right: The Issuer has the right to extraordinary terminate the Securities at the fair market value of the Securities upon the occurrence of certain Call Events (for example, if price quotation of the Underlying on the relevant exchange is finally ceased).

Adjustment right: The Terms and Conditions of the Securities may be adjusted by the Calculation Agent if an Adjustment Event occurs (for example, the company that issued the Underlying performs a corporate action).

Status of the Securities: The obligations under the Securities constitute direct and unsecured obligations of the Issuer and rank pari passu with all other unsecured and unsubordinated obligations of the Issuer. In the case of a resolution (bail-in), the Securities will, within the liability cascade, be considered only after all non-preferred liabilities of the Issuer.

Where will the Securities be traded?

No application for the Securities to be admitted to trading on a regulated market has been made. However, application to trading will be made with effect from 9 March 2022 on the following multilateral trading facilities (MTF): SeDeX, organised and managed by Borsa Italiana S.p.A.

What are the key risks that are specific to the Securities?

The specific risk factors related to the Securities, which in the view of the Issuer are material, are described below:

Risk related to the rank and characteristic of the Securities in the case of a failure of the Issuer: The Security Holders bear the risk of the insolvency of the Issuer. Moreover, Security Holders may become subject to resolution measures in relation to the Issuer if the Issuer is failing or likely to fail.

Specific Risks related to the payment profile of the Securities: There is a particular risk that the price of the Underlying will fall and that the value of the Securities and the payments will be disproportionately adversely affected. As a result, the Security Holder may suffer a loss of the amount paid to purchase the Securities. Even a total loss is possible. The risk of the occurrence of a Knock-out Event may increase significantly due to the regular adjustment of the Knock-out Barrier. Upon the occurrence of a Knock-out Event, the term of the Securities ends and the Security Holder suffers a total loss of the amount paid to purchase the Securities. The performance of the Underlying can have a disproportionately adverse effect on the value of the Securities due to the leverage effect typical for the Securities.

Risks arising from the Terms and Conditions of the Securities: The Security Holders bear a risk of loss if the Securities are terminated by the Issuer. The Securities will then be redeemed at their fair market value of the Securities. This may be lower than the amount that the Security Holder would have received if there had been no extraordinary termination of the Securities. In addition, Security Holders bear a reinvestment risk. Moreover, the Security Holders bear a risk of loss if an adjustment of the Terms and Conditions is made or if a market disruption occurs.

Risks related to the investment in, the holding and selling of the Securities: The Security Holders bear the risk that the market price of the Securities may be subject to severe fluctuations during the term of Securities and that the Security Holder is not able to purchase or to sell the Securities at a specific time or for a specific price.

Risks related to Shares as Underlying: The price of a Share can fall sharply or it can become worthless due to the insolvency of the issuer of the Share. A change in the business development of the issuer of the Share can adversely affect the price of the Share for the Security Holder. The price of a Share can fluctuate strongly due to psychological effects on the stock markets. In the event of extraordinary events, the material conditions and risk profile of a Share can change significantly.
