What are the key risks that are specific to the Issuer?

Risks related to the Issuer's financial situation: Risk that HVB Group will not be able to meet its payment obligations on time or in full or to obtain sufficient liquidity when required as well as that liquidity will only be available at higher interest rates, and the risk that the bank will only be able to liquidate assets on the market at a discount could create liquidity problems for HVB Group and thus could result in a limited ability to fund its activities and meet its minimum liquidity requirements.

Risks related to the Issuer's specific business activities: Risks arising from the normal business activities of HVB Group, which involve credit risk in the lending business, market risk in the trading business as well as risks from other business activities such as the real estate business activities of HVB Group could have an adverse impact on HVB Group's operating results, its assets and its financial situation.

General risks related to the Issuer's business operations: Risks from inadequate or failed internal processes, systems and people or from external events, risks caused by adverse reactions of stakeholders due to their altered perception of the bank, risks from unexpected adverse changes in the future earnings of the bank as well as risks from concentrations of risk and/or

earnings positions could result in financial losses, a downgrade of HVB's rating and an increase in the business risk of the HVB Group.

Legal and regulatory risk: Changes of the regulatory and statutory environment of HVB could result in higher capital costs and a rise of costs for the implementation of regulatory requirements. In cases of non-compliance with regulatory requirements, (tax) laws, regulations, statutory provisions, agreements, mandatory practices and ethical standards, the public perception of HVB Group as well as its earnings and financial situation could be negatively affected.

Strategic and macroeconomic risk: Risks resulting from management either not recognising early enough or not correctly assessing significant developments or trends in the bank's environment and risks arising from negative economic developments in Germany and on the international financial and capital markets could have a negative effect on the assets, liabilities, financial position and profit or loss of HVB Group. In particular, the consequences of the Russian-Ukrainian conflict, a strong rise in energy costs and raw material prices, severe supply bottlenecks and further political uncertainties such as the tensions between the US and China about trade and Taiwan could lead to a more severe slowdown. In addition, if any of the aforementioned risks materialises, turbulence could occur on financial and capital markets.

Redemption of the Securities

Automatic early redemption on the Early Payment Dates (k)

The Securities will be redeemed early on the relevant Early Payment Date (k), if an Early Redemption Event occurs. In this case, the Security Holder receives the Early Redemption Amount (k) on the respective Early Payment Date (k).

An Early Redemption Event means that the Performance of all Basket Components on the respective Observation Date (k) is equal to or greater than the Early Redemption Level_i (k) allocable to the Basket Components_i.

The Performance of the Basket Components on the respective Observation Date (k) is calculated by dividing the Reference Price_i of the Basket Component_i on the respective Observation Date (k) by the Initial Reference Price_i.

k	Observation Date (k)	Early Payment Date (k)	Early Redemption Level _i (k)	Early Redemption Amount (k)
1	29 April 2024	7 May 2024	100%	EUR 1,000.00

13	29 April 2025	7 May 2025	100%	EUR 1,000.00
14	30 May 2025	6 June 2025	100%	EUR 1,000.00
15	30 June 2025	7 July 2025	100%	EUR 1,000.00

Redemption as at the Final Payment Date

If the Securities are not redeemed early, the Securities will be redeemed on the Final Payment Date as follows:

- (A) A Barrier Event has not occurred. The Security Holder receives the Redemption Amount in the Specified Currency which is equal to the Maximum Amount.
- (B) A Barrier Event has occurred and the Final Reference Price is equal to or greater than the Strike. The Security Holder receives the Redemption Amount in the Specified Currency which is equal to the Nominal Amount.
- (C) A Barrier Event has occurred and the Final Reference Price is lower than the Strike. The Security Holder receives delivery of the Underlying in a quantity expressed by the Ratio per Security. If the Ratio leads to a fraction of the Underlying, a cash amount expressed in the Specified Currency is paid instead.

With regard to the payment of the Redemption Amount, the performance of each Basket Component is formed by dividing the respective Final Reference Price_i by the respective Initial Reference Price_i. The Worst Performance (final) will be the lowest value of such quotient.

Additional definitions and product terms

Barrier Event means that the Worst Performance (b) on the respective Barrier Observation Date is lower than the Barrier Level.

With regard to the determination of a Barrier Event, the performance of each Basket Component is formed by dividing the respective Reference Price_i on the Barrier Observation Date by the respective Initial Reference Price_i. The Worst Performance (b) will be the lowest value of such quotient.

Final Reference Price_i means the Reference Price_i of the relevant Basket Component_i determined on the Final Observation Date.

Initial Reference Price_i means the Reference Price_i of the relevant Basket Component_i determined on the Initial Observation Date.

Calculation Amount means EUR 1,000.00.

Barrier Level	Strike	Maximum Amount	Initial Observation Date	Barrier Observation Date	Final Observation Date	Expiry Date (Data di Scadenza)	Final Payment Date
60%	100%	EUR 1,000.00	6 Oct 2023	30 Jul 2025	30 Jul 2025	6 Aug 2025	6 Aug 2025

Extraordinary termination right: The Issuer has the right to extraordinary terminate the Securities at the fair market value of the Securities upon the occurrence of certain Call Events (for example, if price quotation of a Basket Component on the relevant exchange is finally ceased).

Adjustment right: The Terms and Conditions of the Securities may be adjusted by the Calculation Agent if an Adjustment Event occurs (for example, each measure taken by the company that has issued a Basket Component or by a third party which, as a result of a change in the legal and financial position, affects the respective Basket Component).

Status of the Securities: The obligations under the Securities constitute direct and unsecured obligations of the Issuer and rank *pari passu* with all other unsecured and unsubordinated obligations of the Issuer. In the case of a resolution (bail-in), the Securities will, within the liability cascade, be considered only after all non-preferred liabilities of the Issuer.

Where will the Securities be traded?

No application for the Securities to be admitted to trading on a regulated market has been made. However, application to trading will be made with effect from 27 October 2023 on the following multilateral trading facilities (MTF): EuroTLX, organised and managed by Borsa Italiana S.p.A.

What are the key risks that are specific to the Securities?

The specific risk factors related to the Securities, which in the view of the Issuer are material, are described below:

Risk related to the rank and characteristic of the Securities in the case of a failure of the Issuer: The Security Holders bear the risk of the insolvency of the Issuer. Moreover, Security Holders may become subject to resolution measures in relation to the Issuer if the Issuer is failing or likely to fail.

Specific Risks related to the payment profile of the Securities: There is the particular risk that the price of the Basket Component with the worst performance falls during the term of the Securities and consequently the Security Holder will suffer a significant loss of his invested capital. A total loss is possible. Falling prices of the Basket Components will have a negative impact on the Security Holder, especially if a Barrier Event occurs.

Risks relating to Securities with physical delivery: The risk of price losses of the Basket Component with the Worst Performance does not end with its delivery but only with its sale by the Security Holder. There is no automatic sale of the delivered quantity of the Basket Component with the Worst Performance.

Risks arising from the Terms and Conditions of the Securities: The Security Holders bear a risk of loss if the Securities are terminated by the Issuer. The Securities will then be redeemed at their fair market value of the Securities. This may be lower than the amount that the Security Holder would have received if there had been no extraordinary termination of the Securities. In addition, Security Holders bear a reinvestment risk. Moreover, the Security Holders bear a risk of loss if an adjustment of the Terms and Conditions is made or if a market disruption occurs.

Risks related to the investment in, the holding and selling of the Securities: The Security Holders bear the risk that the market price of the Securities may be subject to severe fluctuations during the term of Securities and that the Security Holder is not able to purchase or to sell the Securities at a specific time or for a specific price.

Risks related to Shares as Basket Components: The Securities are associated with similar risks for the Security Holders as in case of a direct investment in the Shares specified as Basket Components. The price of a Share can fall sharply or it can become worthless, e.g. due to the insolvency of the issuer of the Share.

Section 4 – Key information on the offer of the Securities to the public and/or the admission to trading on a regulated market

Under which conditions and timetable can the Investor invest in this Security?
