What are the key risks that are specific to the Issuer?

Risks related to the Issuer's financial situation: Risk that HVB Group will not be able to meet its payment obligations on time or in full or to obtain sufficient liquidity when required as well as that liquidity will only be available at higher interest rates, and the risk that the bank will only be able to liquidate assets on the market at a discount could create liquidity problems for HVB Group and thus could result in a limited ability to fund its activities and meet its minimum liquidity requirements.

Risks related to the Issuer's specific business activities: Risks arising from the normal business activities of HVB Group, which involve credit risk in the lending business, market risk in the trading business as well as risks from other business activities such as the real estate business activities of HVB Group could have an adverse impact on HVB Group's operating results, its assets and its financial situation.

General risks related to the Issuer's business operations: Risks from inadequate or failed internal processes, people and systems or from external events, risks caused by adverse reactions of stakeholders due to their altered perception of the bank, risks from unexpected adverse changes in the future earnings of the bank as well as risks from concentrations of risk and/or earnings positions could result in financial losses, a downgrade of HVB's rating and an increase in the business risk of the HVB Group.

Legal and regulatory risk: Changes of the regulatory and statutory environment of HVB could result in higher capital costs and a rise of costs for the implementation of regulatory requirements. In cases of non-compliance with regulatory requirements, (tax) laws, regulations, statutory provisions, agreements, mandatory practices and ethical standards, the public perception of HVB Group as well as its earnings and financial situation could be negatively affected.

Strategic and macroeconomic risk: Risks resulting from management either not recognising early enough or not correctly assessing significant developments or trends in the bank's environment and risks arising from negative economic developments in Germany and on the international financial and capital markets could have a negative effect on the assets, liabilities, financial position and profit or loss of HVB Group. In particular, the geopolitical tensions, rising protectionism, less dynamic growth in China and a slowdown in the German real estate market could lead to a more severe slowdown in the German economy. In addition, if any of the aforementioned risks materialises, turbulence could occur on financial and capital markets.

The "**Cancellation Amount**" is their fair market value.

Adjustments to the Terms and Conditions: The Calculation Agent may adjust the Terms and Conditions of the Securities if an adjustment event (for example, each measure taken by the company that has issued a Basket Component or by a third party which, as a result of a change in the legal and financial position, affects the respective Basket Component) (the "**Adjustment Event**") occurs.

Status of the Securities: The Securities constitute direct, unconditional and unsecured obligations of the Issuer. The Securities rank *pari passu* with all other unsecured and unsubordinated present and future obligations of the Issuer. Exception: obligations which have a preference or subordination under the law.

Where will the Securities be traded?

Moreover, the Market Maker undertakes to apply, in normal market conditions, a spread between bid and offer quotes not higher than 1.00%.

What are the key risks that are specific to the Securities?

Credit risk of the Issuer and risks in relation to resolution measures in relation to the Issuer: The Securities constitute unsecured obligations of the Issuer vis-a-vis the Security Holders. Any person who purchases the Securities therefore relies on the creditworthiness of the Issuer and has, in relation to his/her position under the Securities, no rights or claims against any other person. Security Holders are subject to the risk of a partial or total failure of the Issuer to fulfil obligations which the Issuer is liable to perform under the Securities in whole or in part, for example, in the event of the Issuer's insolvency. The worse the creditworthiness of the Issuer is the higher is the risk of a loss. In the case of realization of the credit risk of the Issuer the Security Holder may sustain a total loss of his/her capital, even if the Securities provide for a Minimum Amount at their maturity. Moreover, Security Holders may become subject to resolution measures in relation to the Issuer if the Issuer is failing or likely to fail. The obligations of the Issuer under the Securities are not secured, guaranteed by third parties or protected by any deposit protection or compensation scheme.

Risks related to market value-influencing factors: The market value of the Securities will be affected by a number of factors. These are inter alia the creditworthiness of the Issuer, the relevant prevailing interest and yield rates, the market for similar securities, the general economic, political and cyclical conditions, the tradability and, if applicable, the remaining term of the Securities as well as additional Basket Component-related market value-influencing factors. The market value of the Securities as well as the amounts distributable under the Securities primarily depend on the price of the Basket Components.

Risks related to the Redemption Amount: The Redemption Amount may be less than the Issue Price or the purchase price or even be zero. A participation in a favourable performance of the Basket Components beyond the Maximum Amount is excluded. **A total loss is possible.**

Risks related to a Barrier Event: If a Barrier Event occurs, a more advantageous pay-out formula will be disappplied. In any case the Security Holder may lose his invested capital in total or in part.

Risks arising from missing ongoing payments: Any Additional Conditional Amount will only be payable if an Additional Conditional Amount Payment Event occurs with respect to an Additional Conditional Amount Observation Date. If an Additional Conditional Amount Payment Event does not occur, the Security Holder is not entitled to receive the respective Additional Conditional Amount. There is the risk, that in case of an unfavourable performance of the Basket Components no payment of any Additional Conditional Amount may occur.

Risks related to an Automatic Early Redemption: If an Early Redemption Event occurs, the Security Holder will neither participate in any future favourable performance of the Basket Components nor be entitled to further payments under the Securities after an early redemption. In addition, the Security Holders are exposed to the risk that they may only reinvest the principal received due to an early repayment of the Securities to less favourable conditions.

Risks related to the Worst-of Element: Any amounts to be distributed under the Securities, are determined by reference to the price or the performance of the Basket Component with the Worst Performance only. Thus, the Security Holder faces the risk of losses due to the performance of the Basket Component with the Worst Performance, even if some or all other Basket Components perform more favourably.

Risks related to shares: The Securities are associated with similar risks for the Security Holders as in case of a direct investment in the shares specified as Basket Components. The price of a share can fall sharply or it can become worthless, e.g. due to the insolvency of the issuer of the share.

Risks related to potential conflicts of interests: Conflicts of interest in relation to the relevant Issuer or the persons entrusted with the offer may arise, which may result in a decision to the Security Holder's disadvantage.

Liquidity risk: There is a risk that the Securities may not be widely distributed and no active trading market may exist and may develop for the Securities. The Issuer may, but is not obliged to, purchase Securities at any time and at any price in the open market, by tender offer or private agreement. Any Securities purchased in this way by the Issuer may be held, resold or cancelled. A repurchase of Securities by the Issuer may adversely affect the liquidity of the Securities. The Issuer cannot therefore assure that a Security Holder will be able to sell his Securities at an adequate price prior to their redemption.
