What are the key risks that are specific to the Issuer?

Risks related to the Issuer's financial situation: Risk that HVB Group will not be able to meet its payment obligations on time or in full or to obtain sufficient liquidity when required as well as that liquidity will only be available at higher interest rates, and the risk that the bank will only be able to liquidate assets on the market at a discount could create liquidity problems for HVB Group and thus could result in a limited ability to fund its activities and meet its minimum liquidity requirements.

Risks related to the Issuer's specific business activities: Risks arising from the normal business activities of HVB Group, which involve credit risk in the lending business, market risk in the trading business as well as risks from other business activities such as the real estate business activities of HVB Group could have an adverse impact on HVB Group's operating results, its assets and its financial situation.

General risks related to the Issuer's business operations: Risks from inadequate or failed internal processes, people and systems or from external events, risks caused by adverse reactions of stakeholders due to their altered perception of the bank, risks from unexpected adverse changes in the future earnings of the bank as well as risks from concentrations of risk and/or earnings positions could result in financial losses, a downgrade of HVB's rating and an increase in the business risk of the HVB Group.

Legal and regulatory risk: Changes of the regulatory and statutory environment of HVB could result in higher capital costs and a rise of costs for the implementation of regulatory requirements. In cases of non-compliance with regulatory requirements, (tax) laws, regulations, statutory provisions, agreements, mandatory practices and ethical standards, the public perception of HVB Group as well as its earnings and financial situation could be negatively affected.

Strategic and macroeconomic risk: Risks resulting from management either not recognising early enough or not correctly assessing significant developments or trends in the bank's environment and risks arising from negative economic developments in Germany and on the international financial and capital markets could have a negative effect on the assets, liabilities, financial position and profit or loss of HVB Group. In particular, the geopolitical tensions, rising protectionism in the form of higher tariffs, less dynamic growth in China and a slower than expected recovery in the German real estate market can be major downside risks to the German economy. In addition, if any of the aforementioned risks materialises, turbulence could occur on financial and capital markets.

Section 3 – Key information on the Securities

What are the main features of the Securities?

Product Type, Underlying and form of the Securities

Product Type: Tracker Securities (Non-Quanto Securities)

Underlying: LevDAX® x7 (TR) Index EUR (ISIN: DE000A1EXY36 / Reference Price: Closing price)

Reference Underlying: DAX® (Performance) Index (Reuters: .GDAXI)

Leverage Factor: 7

The Securities are governed by Italian law. The Securities are debt instruments in dematerialized registered form pursuant to the Italian Consolidated Law on Financial Intermediation (*Testo Unico della Finanza*). The Securities will be represented by book entry and registered in the books of the Clearing System. The transfer of the Securities operates by registration on the relevant accounts opened in the Clearing System. The international securities identification number (ISIN) of the Securities is set out in Section 1.

Issuance and Term

The Securities will be issued on 9 September 2025 in Euro (EUR) (the **"Specified Currency"**) as up to 5,000,000 Certificates. The Securities have an indefinite term.

General

The Underlying is an Index, which tracks the performance of the Reference Underlying with a constant Leverage Factor. Due to the Leverage Factor, the Security Holder participates in rising prices of the Reference Underlying as well as in falling prices of the Reference Underlying disproportionately (leveraged). The market value of the Securities regularly falls, if the value of the Reference Underlying falls, and regularly rises, if the value of the Reference Underlying rises (long).

Interest

The Securities do not bear interest.

Redemption

The Securities can be redeemed on any Redemption Date upon the exercise of the Redemption Right by the Security Holder. The Securities can also be redeemed in whole on any Call Date upon the exercise of the Regular Call Right by the Issuer.

On the Redemption Date or the Call Date, as applicable, the Security Holder receives the Redemption Amount.

The Redemption Amount is calculated by multiplying the Relevant Reference Price by the Ratio. However, the Redemption Amount will not be lower than EUR 0.00.

Additional definitions and product terms

Call Date means each Banking Day starting on 31 March 2026.

Observation Date means the fifth Banking Day prior to each Redemption Date and each Call Date.

Ratio means the Ratio (initial) on 8 September 2025. On each calendar day thereafter, the Ratio will be adjusted on a daily basis in order to take into account the fees as set out in the table below.

Redemption Date means each Banking Day starting on 30 September 2025.

Relevant Reference Price means the Reference Price on the respective Observation Date.

Gap Risk Fee in % (maximum):	2.6% (8%)
Management Fee in %* (maximum):	0.4% (0.4%)
Ratio (initial):	0.0001

* Values as of 8 September 2025. The Calculation Agent may change the relevant fee at any time subject to the maximum value indicated in brackets.

Extraordinary termination right: Upon the occurrence of one or more call events (for example, an Index Replacement Event (for example the calculation or publication of the Underlying is indefinitely or permanently discontinued) has occurred and no suitable Replacement Underlying is available or can be determined) (the **"Call Event"**), the Issuer may call the Securities extraordinarily and redeem the Securities at their Cancellation Amount. The **"Cancellation Amount"** is their fair market value.

Adjustments to the Terms and Conditions: The Calculation Agent may adjust the Terms and Conditions of the Securities if an adjustment event (for example, a certain change to the relevant index concept) (the **"Adjustment Event"**) occurs.

Reverse Split Right: Upon the occurrence of a Reverse Split Event, the Issuer may convert the Securities into New Securities at the Reverse Split Conversion Factor.

Status of the Securities: The Securities constitute direct, unconditional and unsecured obligations of the Issuer. The Securities rank *pari passu* with all other unsecured and unsubordinated present and future obligations of the Issuer. Exception: obligations which have a preference or subordination under the law.

Where will the Securities be traded?

Admission to trading: No application for the Securities to be admitted to trading on a regulated market has been made.

Listing: Application to trading will be made with effect from 10 September 2025 on the following multilateral trading facilities (MTF): SeDeX managed by Borsa Italiana S.p.A. (**"SeDeX"**)

UniCredit Bank GmbH (the **"Market Maker"**) undertakes to provide liquidity in accordance with the market making rules of SeDeX, where the Securities are expected to be traded.

What are the key risks that are specific to the Securities?

Credit risk of the Issuer and risks in relation to resolution measures in relation to the Issuer: The Securities constitute unsecured obligations of the Issuer vis-a-vis the Security Holders. Any person who purchases the Securities therefore relies on the creditworthiness of the Issuer and has, in relation to his/her position under the Securities, no rights or claims against any other person. Security Holders are subject to the risk of a partial or total failure of the Issuer to fulfil obligations which the Issuer is liable to perform under the Securities in whole or in part, for example, in the event of the Issuer's insolvency. The worse the creditworthiness of the Issuer is the higher is the risk of a loss. In the case of realization of the credit risk of the Issuer the Security Holder may sustain a total loss of his/her capital, even if the Securities provide for a Minimum Amount at their maturity. Moreover, Security Holders may become subject to resolution measures in relation to the Issuer if the Issuer is failing or likely to fail. The obligations of the Issuer under the Securities are not secured, guaranteed by third parties or protected by any deposit protection or compensation scheme.

Risks related to market value-influencing factors: The Security Holders bear the risk that the market price of the Securities may be subject to severe fluctuations during the term of Securities and that the Security Holder is not able to sell the Securities at a specific time or for a specific price. The market value of the Securities will be affected by a number of factors. These are inter alia the creditworthiness of the Issuer, the relevant prevailing interest and yield rates, the market for similar securities, the general economic, political and cyclical conditions, the tradability and, if applicable, the remaining term of the Securities as well as additional Underlying-related market value-influencing factors. The market value of the Securities as well as the amounts distributable under the Securities primarily depend on the price of the Underlying.

Risks related to the Redemption Amount: The Redemption Amount may be less than the Issue Price or the purchase price or even be zero. This means, the Security Holder only achieves a return if the Redemption Amount exceeds the individual purchase price of the Security Holder. Due to the Leverage

Factor comprised in the Underlying, there is even an increased risk of total loss compared to a direct investment in the Reference Underlying. **A total loss is possible.**

Risks arising from missing ongoing payments: The Securities do not bear interest or grant any other conditional or unconditional rights for ongoing payments which could compensate possible losses of principal.

Risks related to the regulation of benchmarks: The Securities make reference to a Benchmark (the "**Benchmark**") within the meaning of Regulation (EU) 2016/1011 (the "**Benchmark Regulation**") and therefore there is a risk that the Benchmark may not be used as reference value of the Securities from a certain point in time. In such event, the Securities could be de-listed, adjusted, converted or otherwise impacted. Any changes to a Benchmark as a result of the Benchmark Regulation could have a material adverse effect on the costs of refinancing a Benchmark or the costs and risks of administering or otherwise participating in the setting of a Benchmark and complying with the Benchmark Regulation. Potential investors should be aware that they face the risk that any changes to the relevant Benchmark may have a material adverse effect on the value of and the amount payable under the Securities.

Risks related to indices: The performance of Securities linked to indices depends on the performance of the respective index. Changes in the price of the components of the index and changes to the composition of the index or other factors may have an adverse effect on the performance of the index. There is a risk that the index may not be used as reference value of the Securities from a certain point in time. In such event, the Securities could be de-listed, adjusted, redeemed prior to maturity or otherwise impacted.

Risks related to potential conflicts of interests: Conflicts of interest in relation to the relevant Issuer or the persons entrusted with the offer may arise, which may result in a decision to the Security Holder's disadvantage.
