What are the key risks that are specific to the Issuer?

Potential investors should be aware that in the case of the occurrence of one of the below mentioned risk factors the Securities may decline in value and that they may sustain a total loss of their investment.

The following risks are key risks specific to the Issuer:

Risks associated with the impact of current macroeconomic uncertainties and the effects of the COVID-19 pandemic outbreak: The UniCredit Group's performance is affected by the financial markets and the macroeconomic and political environment of the countries in which it operates. Expectations regarding the performance of the global economy remain uncertain in both the short term and medium term. Therefore, there is a risk that changes in the macroeconomic environment may have adverse effects on the financial and economic situation as well as on the creditworthiness of the Issuer and/or the Group. It should be noted that the national and international macroeconomic environment is subject to the risks arising from the outbreak of the viral pneumonia known as "Coronavirus" ("COVID-19") and that, currently, while showing the first signs of recovery, it is still characterized by the negative effects of this virus on international and domestic economic activities are evident, thus having an inevitable impact on the performance of the Group. From the main effects of COVID-19 observed impacting on UniCredit performance in 2020, important to be noticed are the following: (i) negative impacts on the retail loans demand and on the corporate loans interest rates, even following the facilitation of loans with state guarantees, with resulting decrease on the interest margin; about the customer loans moratorium, they didn't significantly affect the interest margin; (ii) decreases of the commissions, in all service areas; (iii) additional costs, specifically for devices and equipment needed for the employee's

protection and for a massive transfer to a remote way of working (smart working); (iv) worsening of the cost of risk because of higher provisions on loans. The current environment continues to be characterised by highly uncertain elements, with the possibility that the slowdown of the economy, jointly with the termination of the safeguard measures, such as the customer loans moratorium, generate a worsening of the loan portfolio quality, followed by an increase of the non-performing loans and the necessity to increase the provisions to be charged to the income statement. It should be noted that in 2020 the Group registered a decrease in revenues compared to the 2019, reflecting the extended COVID-19 related restrictions present in all geographies, down 9.0% Y/Y, to Euro 17.1 billion in FY20 with a decrease in all revenue line items. In 1Q21 the Group delivered revenues of Euro 4.7 billion, up 10.6 per cent Q/Q and up 7.1 per cent Y/Y. In 2Q21 revenues were at Euro 4.4 bn, down 6.1 per cent Q/Q and up 5.5 per cent Y/Y. The Group realized Loan Loss Provisions ("LLPs") totaled Euro 4,996 million in Financial Year 2020 ("FY20") (+47.7 per cent FY/FY) of which Euro 2,220 million were specific LLPs, and Euro 2,203 million were overlays on LLP increasing the forward-looking coverage to reflect COVID-19 economic impact on the portfolio, and Euro 572 million on regulatory impacts stemming from the introduction of new models or updating of the existing ones and from the quantification of the evaluative effects correlated to the new European rules on to the classification of the default clients (new Definition of Default). In 2Q21, the Group realized Loan Loss Provisions totaled Euro 360 million (-61.6 per cent Y/Y) of which Euro 246 million (includes among others: IFRS9 macro economic scenario update, sector based provisioning, IFRS9 methodological enhancements, proactive classification and coverage increases in Stage 2) were overlays on loans updating the forward-looking coverage to reflect COVID-19 economic impact on the portfolio, -Euro 29 million were write-backs specific LLPs and Euro 143 million on regulatory impacts stemming from the introduction of new models or updating of the existing ones. In 1H21, the Group realized Loan Loss Provisions for guarantees and commitments totaled Euro 527 million. The Group stated in 2020 a net loss of Euro 2,785 million, compared with the Euro 3,373 million of net profit achieved in 2019, mainly driven by Yapi deconsolidation, integration costs in Italy and CIB goodwill impairment, in addition to the financial-economic context deteriorated by the COVID-19 crisis. The Group delivered underlying net profit of Euro 1.3 billion for FY20, decreasing compared to the underlying net profit of Euro 4.7 billion delivered for FY19. Finally, taking into account the deteriorated conditions of the macroeconomic context and the following adjustments to the revised estimates of the cost of risk, it results that the financial objectives of Team 23 for 2021 are no longer considered relevant, although the strategic priorities communicated last December 2019 have been confirmed. The current framework of high uncertainty and volatility is not currently making possible to perform an overall final assessment of the impacts on the medium/long-term Plan objectives for the next years. In order to determine whether they are still relevant, or how they are impacted, the analyses will be finalised over the next months. In particular, the current scenario is affected by a high degree of uncertainty whose outcome is not foreseeable at the moment, in light of the evolution of the pandemic, on the effect of relief measures put in place and the shape of economic recovery. These factors will affect the Group profitability and the parameters, such as discount rates, used for evaluating Group's assets. Furthermore, considering the high uncertainty of current context, an update in the strategic plan Team 23 that reflects current conditions will be presented during the fourth quarter of 2021. As a result, the evaluation made for Investments in associates and Deferred Tax Assets, whose recoverable amount depends on cash flows projections, might be subject to a change not foreseeable at the moment and from which could derive possible negative effects, including significant ones, on the bank's financial and economic situation.

Risks connected with the Strategic Plan 2020 – 2023: On 3 December 2019, following the completion of the 2016-2019 Strategic Plan, UniCredit presented to the financial community in London the 2020-2023 Strategic Plan called "Team 23" (the "Strategic Plan" or "Plan" or "Team 23"). The Strategic Plan contains determined strategic, capital and financial objectives (collectively, the "Strategic Objectives") based on four pillars. Such Strategic Objectives focus on improving the cost of risk, reducing the gross NPE ratio, maintaining an appropriate capital buffer throughout the Plan as well as objectives in terms of underlying net profit and capital distribution. The four pillars are: (i) growth and strengthen client franchise; (ii) transform and maximise productivity; (iii) disciplined risk management & controls; and (iv) capital and balance sheet management. UniCredit's ability to meet the Strategic Objectives depends on a number of assumptions and circumstances, some of which are outside UniCredit's control, including those relating to developments in the macroeconomic environment in which the UniCredit Group operates, developments in applicable laws and regulations and assumptions related to the effects of specific actions or future events which we can partially forecast/manage. The assumptions concerning the macroeconomic scenario and the development of the regulatory framework, as well as the hypothetical assumptions on which the Plan is based, were made prior to the adoption of the restrictive provisions related to the spread of COVID-19 throughout the countries and, therefore, in a macroeconomic environment different from that one determined next to the entry into force of the restrictive provisions ("lockdown") resulting from the pandemic. Indeed, whilst the 2020 financial results have been influenced by the pandemic, the financial results for this year and potentially subsequent years could be influenced by the dynamics of the COVID-19, which were not foreseeable at the date of the Strategic Plan presentation and which are still uncertain. Taking into account the revised estimates of the cost of risk, it results that the financial objectives of Team 23 for 2021 are no longer considered relevant, although the strategic priorities communicated last December 2019 have been confirmed. Given the high uncertainty of the environment, an update of Team 23 strategic plan will be run and presented to the markets in the Capital Markets Day in the fourth quarter of 2021 (the review of the Strategic Plan initiated following arrival of new Chief Executive Officer and Board of Directors). For all these reasons, investors are cautioned against making their investment decisions based exclusively on the forecast data included in the Strategic Objectives. Any failure to implement the Strategic Objectives or meet the Strategic Objectives may have a material adverse effect on UniCredit's business, financial condition or results of operations.

Credit risk and risk of credit quality deterioration: The activity, financial and capital strength and profitability of the UniCredit Group depend, among other things, on the creditworthiness of its customers. In carrying out its credit activities, the Group is exposed to the risk that an unexpected change in the creditworthiness of a counterparty may generate a corresponding change in the value of the associated credit exposure and give rise to the partial or total write-down thereof. Following the COVID-19 outbreak it cannot be excluded that, credit quality for this year could be influenced with potential impacts not yet quantifiable. From the main effects of COVID-19 observed impacting on UniCredit risk profile in 2020, it is important to notice the worsening of the cost of risk because of higher provisions on loans. The current environment continues to be characterised by highly uncertain elements, with the possibility that the slowdown of the economy, jointly with the termination of the safeguard measures, such as the customer loans moratorium, generate a worsening of the loan portfolio quality, followed by an increase of the non-performing loans and the necessity to increase the provisions to be charged in the income statement. The Group realized LLPs totaled Euro 4,996 million in FY20 (+47.7 per cent FY/FY) of which Euro 2,220 million were specific LLPs, and Euro 2,203 million were overlays on LLP increasing the forward-looking coverage to reflect COVID-19 economic impact on the portfolio, and Euro 572 million on regulatory impacts stemming from the introduction of new models or updating of the existing ones and from the quantification of the evaluative effects correlated to the new European rules on to the classification of the default clients (new Definition of Default). In 2Q21, the Group realized Loan Loss Provisions totaled Euro 360 million (-61.6 per cent Y/Y) of which Euro 246 million were overlays on loans updating the forward-looking coverage to reflect COVID-19 economic impact on the portfolio, -Euro 29 million were write-backs specific LLPs and Euro 143 million on regulatory impacts stemming from the introduction of new models or updating of the existing ones. In 1H21, the Group realized Loan Loss Provisions for guarantees and commitments totaled Euro 527 million. As at 30 June 2021 Group gross NPEs ratio was equal to 4.7 per cent., decreasing compared to 31 March 2021 in which the gross NPE ratio was equal to 4.8%. As at 30 June 2021 Group Net NPE ratio remained stable compared to 31 March 2021 and is equal to 2.1%. The NPL ratio for UniCredit, using the EBA definition, in 2Q21 is in line with the weighted average of EBA sample banks. In the context of credit activities, this risk involves, among other things, the possibility that the Group's contractual counterparties may not fulfil their payment obligations, as well as the possibility that Group companies may, based on incomplete, untrue or incorrect information, grant credit that otherwise would not have been granted or that would have been granted under different conditions. Other banking activities, besides the traditional lending and deposit activities, can also expose the Group to credit risks. "Non-traditional" credit risk can, for example, arise from: (i) entering derivative contracts; (ii) buying and selling securities currencies or goods; and (iii) holding third-party securities. The counterparties of said transactions or the issuers of securities held by Group entities could fail to comply due to insolvency, political or economic events, a lack of liquidity, operating deficiencies, or other reasons. The Group has adopted procedures, rules and principles aimed at monitoring and managing credit risk at both individual counterparty and portfolio level. However, there is the risk that, despite these credit risk monitoring and management activities, the Group's credit exposure may exceed predetermined risk's levels pursuant to the procedures, rules and principles it has adopted. The importance of reducing the ratio of non-

performing loans to total loans has been stressed on several occasions by the supervisory authorities, both publicly and within the ongoing dialogue with the Italian banks and, therefore, with the UniCredit Group.

Liquidity Risk: The main indicators used by the UniCredit Group to assess its liquidity profile are (i) the Liquidity Coverage Ratio (LCR), which represents an indicator of short-term liquidity subject to a minimum regulatory requirement of 100% from 2018 and which was equal to 185.2% in June 2021, whereas at 31 December 2020 was equal to 171% (calculated as the average of the 12 latest end of month ratios), and (ii) the Net Stable Funding Ratio (NSFR), which represents the indicator of structural liquidity and which in June 2021 was above the internal limit set at 102.5%, whereas at 31 December 2020 was above the internal limit set at 101.3% within the risk appetite framework. Liquidity risk refers to the possibility that the UniCredit Group may find itself unable to meet its current and future, anticipated and unforeseen cash payment and delivery obligations without impairing its day-to-day operations or financial position. The activity of the UniCredit Group is subject in particular to funding liquidity risk, market liquidity risk, mismatch risk and contingency risk. The most relevant risks that the Group may face are: i) an exceptionally high usage of the committed and uncommitted lines granted to corporate customers; ii) the capacity to roll over the expiring wholesale funding and the potential cash or collateral outflows the Group may suffer in case of rating downgrades of both the banks or the sovereign debt in the geographies in which it operates. In addition to this, some risks may arise from the limitations applied to the cross-border lending among banks, which have been increased in some countries. Due to the financial market crisis, followed also by the reduced liquidity available to operators in the sector, the ECB has implemented important interventions in monetary policy, such as the "Targeted Longer-Term Refinancing Operation" ("TLTRO") introduced in 2014 and the TLTRO II introduced in 2016. In March 2019, the ECB announced a new series of quarterly targeted longer-term refinancing operations (TLTRO-III) to be launched in September 2019 to March 2021, each with a maturity of two years, recently shifted by an additional year. In March 2020 new long-term refinancing operations (LTROs) were announced to provide a bridge until the TLTRO III window in June 2020 and ensure liquidity and regular money market conditions. These measures were integrated with temporary collateral easing measures. It is not possible to predict the duration and the amounts with which these liquidity support operations can be repeated in the future, with the result that it is not possible to exclude a reduction or even the cancellation of this support. This would result in the need for banks to seek alternative sources of borrowing, without ruling out the difficulties of obtaining such alternative funding as well as the risk that the related costs could be higher. Such a situation could therefore adversely affect UniCredit's business, operating results and the economic and financial position of UniCredit and/or the Group.

Basel III and Bank Capital Adequacy: The Issuer shall comply with the revised global regulatory standards ("Basel III") on bank capital adequacy and liquidity, which impose requirements for, inter alia, higher and better-quality capital, better risk coverage, measures to promote the build-up of capital that can be drawn down in periods of stress and the introduction of a leverage ratio as a backstop to the risk-based requirement as well as two global liquidity standards. In terms of banking prudential regulations, the Issuer is also subject to the Bank Recovery and Resolution Directive 2014/59/EU of 15 May 2014 ("BRRD", implemented in Italy with the Legislative Decree. 180 and 181 of 16 November 2015) on the recovery and resolution of credit institutions, as well as the relevant technical standards and guidelines from EU regulatory bodies (i.e. the European Banking Authority (EBA)), which, inter alia, provide for capital requirements for credit institutions, recovery and resolution mechanisms. Should UniCredit not be able to meet the capital requirements imposed by the applicable laws and regulations, it may be required to maintain higher levels of capital which could potentially impact its credit ratings, and funding conditions and which could limit UniCredit's growth opportunities.

Section 3 – Key information on the Securities

What are the main features of the Securities?

Product Type, Underlying and form of the Securities

Product Type: Express Plus Securities

Underlying: Banco Santander S.A. (ISIN ES0113900J37)

The Securities are governed by Italian law. The Securities are debt instruments in dematerialized registered form pursuant to the Italian Consolidated Law on Financial Intermediation (*Testo Unico della Finanza*). The Securities will be represented by book entry and registered in the books of the Clearing System. The transfer of the Securities operates by registration on the relevant accounts opened in the Clearing System. The international securities identification number (ISIN) of the Securities is set out in Section 1.

Issuance and Nominal Amount

The Securities will be issued on 21 September 2021 in Euro (EUR) (the "**Specified Currency**"), with a Nominal Amount of EUR 1,000.00 per Security (the "**Nominal Amount**").

General

The value of the Securities during their term depends mainly on the price of the Underlying. In principle, the value of the Securities rises if the price of the Underlying rises and falls if the price of the Underlying falls.

Interest

The Securities do not bear interest.

Additional Amount

Provided that no Call Event and no Early Redemption Event (k) has occurred, the Security Holder will receive an Additional Conditional Amount (m) subject to the following conditions:

- If with respect to an Observation Date (m) an Additional Conditional Amount Payment Event (m) has occurred, an Additional Conditional Amount (m) is paid on the respective Additional Conditional Amount Payment Date (m) less all Additional Conditional Amounts (m) paid on the preceding Additional Conditional Amount Payment Dates (m).
- If with respect to an Observation Date (m) no Additional Conditional Amount Payment Event (m) has occurred, no Additional Conditional Amount (m) is paid on the respective Additional Conditional Amount Payment Date (m).
- If on an Observation Date (k) an Early Redemption Event (k) occurs, payment of the Additional Conditional Amount (m) will lapse for all following Additional Conditional Amount Payment Dates (m).

An Additional Conditional Amount Payment Event (m) occurs, if R (m) on an Observation Date (m) is equal to or greater than the respective Additional Conditional Amount Payment Level (m).

Additional Conditional Amount Payment Level (m) means the product of the Additional Conditional Amount Payment Factor (m) and R (initial).

R (m) means the Reference Price of the Underlying on the respective Observation Date (m).

Redemption

Automatic Early Redemption

Provided that no Call Event has occurred, the Securities allow for an automatic early redemption at the respective Early Redemption Amount (k) on the respective Early Payment Date (k), if an Early Redemption Event (k) has occurred.

An Early Redemption Event (k) occurs, if R (k) on an Observation Date (k) is equal to or greater than the Early Redemption Level (k).

Early Redemption Level (k) means the product of the Early Redemption Factor (k) and R (initial).

R (k) means the Reference Price of the Underlying on the respective Observation Date (k).

Observation Date (k):	14 June 2022 (1), 14 September 2022 (2), 14 December 2022 (3), 14 March 2023 (4), 14 June 2023 (5), 14 September 2023 (6), 14 December 2023 (7), 14 March 2024 (8), 14 June 2024 (9), 16 September 2024 (10), 16 December 2024 (11), 14 March 2025 (12), 16 June 2025 (13)

Redemption as at the Final Payment Date

Provided that no Call Event and no Early Redemption Event (k) has occurred, the Securities will be redeemed on the Final Payment Date by payment of the Redemption Amount as follows:

- If no Barrier Event has occurred, the Redemption Amount corresponds to the Maximum Amount.
- If a Barrier Event has occurred, the Redemption Amount corresponds to the Nominal Amount multiplied by the quotient of R (final) divided by the Strike. The Redemption Amount is not greater than the Nominal Amount.

Additional definitions and product terms

Barrier means the product of the Barrier Level and R (initial).

A Barrier Event occurs if R (final) is lower than the Barrier on the Final Observation Date.

R (final) means the Reference Price of the Underlying on the Final Observation Date.

R (initial) means the Reference Price of the Underlying on the Initial Observation Date.

Strike means the product of the Strike Level and R (initial).

Barrier Level:	50%
Final Observation Date:	15 September 2025
Final Payment Date:	22 September 2025
Initial Observation Date:	17 September 2021
Maximum Amount:	EUR 1,000.00
Strike Level:	100%

Extraordinary termination right: Upon the occurrence of one or more call events (e.g. the price quotation of the Underlying on the Relevant Exchange is finally ceased) (the "Call Event") the Issuer may call the Securities extraordinarily and redeem the Securities at their Cancellation Amount. The "Cancellation Amount" is their fair market value.

Adjustments to the Terms and Conditions: The Calculation Agent may adjust the Terms and Conditions of the Securities (in particular the Underlying and/or all prices of the Underlying which have been specified by the Calculation Agent) if an adjustment event (e.g. the company that issued the Underlying performs a corporate action) (the "Adjustment Event") occurs.

Status of the Securities: The obligations of the Issuer under the Securities constitute direct, unconditional, unsubordinated and unsecured obligations of the Issuer, ranking (subject to any obligations preferred by any applicable law (also subject to the bail-in instruments as implemented under Italian law)) *pari passu* with all other unsecured obligations (other than obligations ranking junior to the senior notes from time to time (including non-preferred senior notes and any further obligations permitted by law to rank junior to the senior notes following the Issue Date), if any) of the Issuer, present and future and, in the case of the senior notes, *pari passu* and rateably without any preference among themselves.

Where will the Securities be traded?

Admission to trading: No application for the Securities to be admitted to trading on a regulated market has been made.

Listing: Application to trading will be made with effect from 28 September 2021 on the following multilateral trading facilities (MTF): EuroTLX managed by Borsa Italiana S.p.A. ("EuroTLX")

UniCredit Bank AG (the "Market Maker") undertakes to provide liquidity in accordance with the market making rules of EuroTLX, where the Securities are expected to be traded. Moreover, the Market Maker undertakes to apply, in normal market conditions, a spread between bid and offer quotes not higher than 1.00%.

What are the key risks that are specific to the Securities?

Credit risk of the Issuer and risks in relation to resolution measures in relation to the Issuer: The Securities constitute unsecured obligations of the Issuer vis-a-vis the Security Holders. Any person who purchases the Securities therefore relies on the creditworthiness of the Issuer and has, in relation to his/her position under the Securities, no rights or claims against any other person. Security Holders are subject to the risk of a partial or total failure of the Issuer to fulfil obligations which the Issuer is liable to perform under the Securities in whole or in part, for example, in the event of the Issuer's insolvency. The worse the creditworthiness of the Issuer is the higher is the risk of a loss. In the case of realization of the credit risk of the Issuer the Security Holder may sustain a total loss of his/her capital, even if the Securities provide for a Minimum Amount at their maturity. Moreover, Security Holders may become subject to resolution measures in relation to the Issuer if the Issuer is failing or likely to fail. The obligations of the Issuer under the Securities are not secured, guaranteed by third parties or protected by any deposit protection or compensation scheme.

Risks related to market value-influencing factors: The market value of the Securities will be affected by a number of factors. These are inter alia the creditworthiness of the Issuer, the relevant prevailing interest and yield rates, the market for similar securities, the general economic, political and cyclical conditions, the tradability and, if applicable, the remaining term of the Securities as well as additional Underlying-related market value-influencing factors. The market value of the Securities as well as the amounts distributable under the Securities primarily depend on the price of the Underlying.

Risks related to the Redemption Amount: The Redemption Amount may be less than the Issue Price or the purchase price or even be zero. Potential return from the Securities is limited in contrast to a direct investment in the Underlying. A participation in a favourable performance of the Underlying beyond the Maximum Amount is excluded. **A total loss is possible.**

Risks related to a Barrier Event: If a Barrier Event occurs, a more advantageous pay-out formula will be disappplied. In any case the Security Holder may lose his invested capital in total or in part.

Risks arising from missing ongoing payments: Any Additional Conditional Amount (m) will only be payable if an Additional Conditional Amount Payment Event (m) occurs with respect to an Observation Date (m). If an Additional Conditional Amount Payment Event (m) does not occur, the Security Holder is not entitled to receive the respective Additional Conditional Amount (m). There is the risk, that in case of an unfavourable performance of the Underlying no payment of any Additional Conditional Amount (m) may occur.

Risks related to an Automatic Early Redemption: If an Early Redemption Event occurs, the Security Holder will neither participate in any future favourable performance of the Underlying nor be entitled to further payments under the Securities after an early redemption. In addition, the Security Holders are exposed to the risk that they may only reinvest the principal received due to an early repayment of the Securities to less favourable conditions.

Risks related to shares: The Securities are associated with similar risks for the Security Holders as in case of a direct investment in the shares specified as Underlying. The price of a share can fall sharply or it can become worthless, e.g. due to the insolvency of the issuer of the share.

Risks related to potential conflicts of interests: Conflicts of interest in relation to the relevant Issuer or the persons entrusted with the offer may arise, which may result in a decision to the Security Holder's disadvantage.

Liquidity risk: There is a risk that the Securities may not be widely distributed and no active trading market may exist and may develop for the Securities. The Issuer may, but is not obliged to, purchase Securities at any time and at any price in the open market, by tender offer or private agreement. Any Securities purchased in this way by the Issuer may be held, resold or cancelled. A repurchase of Securities by the Issuer may adversely affect the liquidity of the Securities. The Issuer cannot therefore assure that a Security Holder will be able to sell his Securities at an adequate price prior to their redemption.
