What are the key risks that are specific to the Issuer?

Potential investors should be aware that in the case of the occurrence of one of the below mentioned risk factors the Securities may decline in value and that they may sustain a total loss of their investment. The following risks are key risks specific to the Issuer:

Risks associated with the impact of current macroeconomic uncertainties and the effects of the COVID-19 pandemic outbreak and recent geopolitical tensions with Russia:

The financial markets and the macroeconomic and political environment of the countries in which UniCredit operates were impacted by the viral pneumonia known as "Coronavirus" ("COVID-19") outbreak and this has had and could continue to have a negative impact on the performance of the Group. Moreover, the valuation of certain assets has become complex and uncertain as a result of the lockdown measures and other restrictive measures put in place by governments for the containment of COVID 19 pandemic, even though progressively lifted, as well as recent geopolitical tensions with Russia. Expectations regarding the performance of the global economy remain therefore still uncertain in both the short and medium term. The macroeconomic context in which the Group functioned in 2021 was characterized by the encouraging signs of recovery compared with the prior year, supported by the governmental measures sustaining the economy, by vaccination campaigns and by the progressive slowing-down of the lockdown measures. The current environment continues to be characterized by highly uncertain elements, such as geopolitical tensions with Russia, with the possibility that the slowdown of the economy could generate a worsening of the loan portfolio quality, followed by an increase of the non-performing loans and the necessity to increase the provisions to be charged to the income statement. On 9 December 2021 UniCredit presented to the financial community its new Strategic Plan, which included a set of strategic and financial objectives that considered the underlying scenario and resulted from the assessment performed in the previous months. The macro assumptions underlying the Strategic Plan exclude (Macro assumptions consider the recent and still existing impacts of COVID with a gradual normalisation over the upcoming years. The scenario does not assume that the current COVID situation will develop in a particularly negative way in the upcoming years) unexpected materially adverse developments such as the worsening of the COVID-19 pandemic, a situation that UniCredit is monitoring closely. The evaluations processes, such as Deferred Tax Assets, whose recoverable amount depends on cash flows projections, might be subject to a change not foreseeable at the moment and from which could derive possible negative effects, including significant ones, on the bank's financial and economic situation.

Risks connected with the Strategic Plan 2022 – 2024: On 9th December 2021, UniCredit presented to the financial community in Milan the 2022-2024

Strategic Plan called “UniCredit Unlocked” (the “**Strategic Plan**” or “**Plan**”) which contains a number of strategic, capital and financial objectives (the “**Strategic Objectives**”). “UniCredit Unlocked” delivers strategic imperatives and financial ambitions based on six pillars. Such strategic imperatives and financial ambitions regard: (i) the growth in its regions and the development of its client franchise, changing its business model and how its people operate; (ii) the delivery of economies of scale from its footprint of banks, transforming the technology leveraging Digital & Data and embedding sustainability in all that UniCredit does; (iii) driving financial performance via three interconnecting levers. UniCredit’s ability to meet the strategic objectives and all forward-looking statements relies on a number of assumptions, expectations, projections and provisional data concerning future events and is subject to a number of uncertainties and other factors, many of which are outside the control of UniCredit. Macro assumptions exclude (Macro assumptions consider the recent and still existing impacts of COVID with a gradual normalisation over the upcoming years. The scenario does not assume that the current COVID situation will develop in a particularly negative way in the upcoming years) unexpected materially adverse developments such as the worsening of the COVID-19 pandemic, a situation that UniCredit is monitoring closely. The six pillars are: (i) optimise, through the improvement of operational and capital efficiency; (ii) invest, with targeted growth initiatives, including ESG; (iii) grow net revenues; (iv) return; (v) strengthen thanks to revised CET1 ratio target and decrease of Gross NPE ratio; and (vi) distribute consistently with organic capital generation. For all these reasons, investors are cautioned against making their investment decisions based exclusively on the forecast data included in the strategic objectives. Any failure to implement the strategic objective or meet the strategic objectives may have a material adverse effect on UniCredit’s business, financial condition or results of operations.

Credit risk and risk of credit quality deterioration: The activity, financial and capital strength and profitability of the UniCredit Group depend, among other things, on the creditworthiness of its customers. In carrying out its credit activities, the Group is exposed to the risk that an unexpected change in the creditworthiness of a counterparty may generate a corresponding change in the value of the associated credit exposure and give rise to the partial or total write-down thereof. The current environment continues to be characterised by highly uncertain elements, with the possibility that the slowdown of the economy, jointly with the termination of the safeguard measures, such as the customer loans moratorium, generates a worsening of the loan portfolio quality, followed by an increase of the non-performing loans and the necessity to increase the provisions to be charged in the income statement. UniCredit’s Loan Loss Provisions (“**LLPs**”), excluding Russia, decreased by 93.2 per cent Q/Q and 64.6 per cent Y/Y to Euro 52 million in 1Q22. Therefore, the cost of risk, excluding Russia, decreased by 67 bps Q/Q and 9 bps Y/Y to 5 bps in 1Q22. As at 31 March 2022, Group gross NPE ratio, excluding Russia, was equal to 3.5 per cent, decreasing compared to 31 December 2021 in which the gross NPE ratio was equal to 3.6%. As at 31 March 2022 Group Net NPE ratio, excluding Russia, substantially stable compared to 31 December 2021 and is equal to 1.6%. In the context of credit activities, this risk involves, among other things, the possibility that the Group’s contractual counterparties may not fulfil their payment obligations, as well as the possibility that Group companies may, based on incomplete, untrue or incorrect information, grant credit that otherwise would not have been granted or that would have been granted under different conditions. Other banking activities, besides the traditional lending and deposit activities, can also expose the Group to credit risks. “Non-traditional” credit risk can, for example, arise from: (i) entering derivative contracts; (ii) buying and selling securities currencies or goods; and (iii) holding third-party securities. The counterparties of said transactions or the issuers of securities held by Group entities could fail to comply due to insolvency, political or economic events, a lack of liquidity, operating deficiencies, or other reasons. The Group has adopted procedures, rules and principles aimed at monitoring and managing credit risk at both individual counterparty and portfolio level. However, there is the risk that, despite these credit risk monitoring and management activities, the Group’s credit exposure may exceed predetermined risk’s levels pursuant to the procedures, rules and principles it has adopted.

Liquidity Risk: The main indicators used by the UniCredit Group to assess its liquidity profile are (i) the Liquidity Coverage Ratio (LCR), which represents an indicator of short-term liquidity subject to a minimum regulatory requirement of 100% from 2018 and which was equal to 177% in March 2022, whereas at 31 December 2021 was equal to 182% (calculated as the average of the 12 latest end of month ratios), and (ii) the Net Stable Funding Ratio (NSFR), which represents the indicator of structural liquidity and which in March 2022 was above the internal limit set at 102%, as at 31 December 2021, within the risk appetite framework. Liquidity risk refers to the possibility that the UniCredit Group may find itself unable to meet its current and future, anticipated and unforeseen cash payment and delivery obligations without impairing its day-to-day operations or financial position. The activity of the UniCredit Group is subject in particular to funding liquidity risk, market liquidity risk, mismatch risk and contingency risk. The most relevant risks that the Group may face are: i) an exceptionally high usage of the committed and uncommitted lines granted to corporate customers; ii) an unusual withdrawal of sight deposits by UniCredit’s retail and corporate customers; iii) the decline in the market value of the securities in which UniCredit invests its liquidity buffer; iv) the capacity to roll over the expiring wholesale funding and the potential cash or collateral outflows the Group may suffer in case of rating downgrades of both the banks or the sovereign debt in the geographies in which it operates. In addition to this, some risks may arise from the limitations applied to the cross-border lending among banks. Due to the financial market crisis, followed also by the reduced liquidity available to operators in the sector, the ECB has implemented important interventions in monetary policy, such as the “Targeted Longer-Term Refinancing Operation” (“**TLTRO**”) introduced in 2014 and the **TLTRO II** introduced in 2016. It is not possible to predict the duration and the amounts with which these liquidity support operations can be repeated in the future, with the result that it is not possible to exclude a reduction or even the cancellation of this support. This would result in the need for banks to seek alternative sources of borrowing, without ruling out the difficulties of obtaining such alternative funding as well as the risk that the related costs could be higher. Such a situation could therefore adversely affect UniCredit’s business, operating results and the economic and financial position of UniCredit and/or the Group.

Basel III and Bank Capital Adequacy: The Issuer shall comply with the revised global regulatory standards (“**Basel III**”) on bank capital adequacy and liquidity, which impose requirements for, inter alia, higher and better-quality capital, better risk coverage, measures to promote the build-up of capital that can be drawn down in periods of stress and the introduction of a leverage ratio as a backstop to the risk-based requirement as well as two global liquidity standards. In terms of banking prudential regulations, the Issuer is also subject to the Bank Recovery and Resolution Directive 2014/59/EU of 15 May 2014 (“**BRRD**”), implemented in Italy with the Legislative Decree. 180 and 181 of 16 November 2015 - as amended by the Directive (EU) 2019/879, the “**BRRDII**” (implemented in Italy by the Legislative Decree No. 193 of November 8, 2021) on the recovery and resolution of credit institutions, as well as the relevant technical standards and guidelines from EU regulatory bodies (i.e. the European Banking Authority (EBA)), which, inter alia, provide for capital/ Minimum Requirement for Own Funds and Eligible Liabilities (MREL) requirements for credit institutions, recovery and resolution mechanisms. Should UniCredit not be able to meet the capital/MREL requirements imposed by the applicable laws and regulations, it may be required to maintain higher levels of capital which could potentially impact its credit ratings, and funding conditions and which could limit UniCredit’s growth opportunities.

Section 3 – Key information on the Securities

What are the main features of the Securities?

Product Type, Underlying and form of the Securities

Product Type: Express Plus Securities

Underlying: Amazon.com Inc. (ISIN: US0231351067 / Reference Price: Closing price)

The Securities are governed by Italian law. The Securities are debt instruments in dematerialized registered form pursuant to the Italian Consolidated Law on Financial Intermediation (*Testo Unico della Finanza*). The Securities will be represented by book entry and registered in the books of the Clearing System. The transfer of the Securities operates by registration on the relevant accounts opened in the Clearing System. The international securities identification number (ISIN) of the Securities is set out in Section 1.

Issuance and Nominal Amount

The Securities will be issued on 30 June 2022 in Euro (EUR) (the “**Specified Currency**”), with a Nominal Amount of EUR 100.00 per Security (the “**Nominal Amount**”).

General

The value of the Securities during their term depends mainly on the price of the Underlying. In principle, the value of the Securities rises if the price of the Underlying rises and falls if the price of the Underlying falls.

Interest

The Securities do not bear interest.

Additional Amount

Provided that no Call Event and no Early Redemption Event (k) has occurred, the Security Holder will receive an Additional Conditional Amount (m) subject to the following conditions:

- If with respect to an Observation Date (m) an Additional Conditional Amount Payment Event (m) has occurred, an Additional Conditional Amount (m) is paid on the respective Additional Conditional Amount Payment Date (m) less all Additional Conditional Amounts (m) paid on the preceding Additional Conditional Amount Payment Dates (m).
- If with respect to an Observation Date (m) no Additional Conditional Amount Payment Event (m) has occurred, no Additional Conditional Amount (m) is paid on the respective Additional Conditional Amount Payment Date (m).
- If on an Observation Date (k) an Early Redemption Event (k) occurs, payment of the Additional Conditional Amount (m) will lapse for all following Additional Conditional Amount Payment Dates (m).

An Additional Conditional Amount Payment Event (m) occurs, if R (m) on an Observation Date (m) is equal to or greater than the respective Additional Conditional Amount Payment Level (m).

Additional Conditional Amount Payment Level (m) means the product of the Additional Conditional Amount Payment Factor (m) and R (initial).

R (m) means the Reference Price of the Underlying on the respective Observation Date (m).

Additional Conditional Amount Payment Factor (m):	60% (1), 60% (2), 60% (3), 60% (4), 60% (5), 60% (6)
Additional Conditional Amount (m):	EUR 4.00 (1), EUR 8.00 (2), EUR 12.00 (3), EUR 16.00 (4), EUR 20.00 (5), EUR 24.00 (6)
Additional Conditional Amount Payment Date (m):	30 December 2022 (1), 30 June 2023 (2), 29 December 2023 (3), 28 June 2024 (4), 30 December 2024 (5), 30 June 2025 (6)
Observation Date (m):	22 December 2022 (1), 23 June 2023 (2), 20 December 2023 (3), 21 June 2024 (4), 19 December 2024 (5), 23 June 2025 (6)
Record Date (m):	29 December 2022 (1), 29 June 2023 (2), 28 December 2023 (3), 27 June 2024 (4), 27 December 2024 (5), 27 June 2025 (6)

Redemption

Automatic Early Redemption

Provided that no Call Event has occurred, the Securities allow for an automatic early redemption at the respective Early Redemption Amount (k) on the respective Early Payment Date (k), if an Early Redemption Event (k) has occurred.

An Early Redemption Event (k) occurs, if R (k) on an Observation Date (k) is equal to or greater than the Early Redemption Level (k).

Early Redemption Level (k) means the product of the Early Redemption Factor (k) and R (initial).

R (k) means the Reference Price of the Underlying on the respective Observation Date (k).

Observation Date (k):	22 December 2022 (1), 23 June 2023 (2), 20 December 2023 (3), 21 June 2024 (4), 19 December 2024 (5)
Early Redemption Factor (k):	100% (1), 100% (2), 100% (3), 100% (4), 100% (5)
Early Redemption Amount (k):	EUR 100.00 (1), EUR 100.00 (2), EUR 100.00 (3), EUR 100.00 (4), EUR 100.00 (5)
Early Payment Date (k):	30 December 2022 (1), 30 June 2023 (2), 29 December 2023 (3), 28 June 2024 (4), 30 December 2024 (5)

Redemption as at the Final Payment Date

Provided that no Call Event and no Early Redemption Event (k) has occurred, the Securities will be redeemed on the Final Payment Date by payment of the Redemption Amount as follows:

- If no Barrier Event has occurred, the Redemption Amount corresponds to the Maximum Amount.
- If a Barrier Event has occurred, the Redemption Amount corresponds to the Nominal Amount multiplied by the quotient of R (final) divided by the Strike. The Redemption Amount is not greater than the Nominal Amount.

Additional definitions and product terms

Barrier means the product of the Barrier Level and R (initial).

A Barrier Event occurs if R (final) is lower than the Barrier on the Final Observation Date.

R (final) means the Reference Price of the Underlying on the Final Observation Date.

R (initial) means the Reference Price of the Underlying on the Initial Observation Date.

Strike means the product of the Strike Level and R (initial).

Barrier Level:	60%
Final Observation Date:	23 June 2025
Final Payment Date:	30 June 2025
Initial Observation Date:	29 June 2022
Maximum Amount:	EUR 100.00

Strike Level:

100%

Extraordinary termination right: Upon the occurrence of one or more call events (e.g. the price quotation of the Underlying on the Relevant Exchange is finally ceased and no Replacement Exchange could be determined) (the "**Call Event**") the Issuer may call the Securities extraordinarily and redeem the Securities at their Cancellation Amount. The "**Cancellation Amount**" is their fair market value.

Adjustments to the Terms and Conditions: The Calculation Agent may adjust the Terms and Conditions of the Securities (in particular the Underlying and/or all prices of the Underlying which have been specified by the Calculation Agent) if an adjustment event (e.g. the company that issued the Underlying performs a corporate action) (the "**Adjustment Event**") occurs.

Status of the Securities: The obligations of the Issuer under the Securities constitute direct, unconditional, unsubordinated and unsecured obligations of the Issuer, ranking (subject to any obligations preferred by any applicable law (also subject to the bail-in instruments as implemented under Italian law)) *pari passu* with all other unsecured obligations (other than obligations ranking junior to the senior notes from time to time (including non-preferred senior notes and any further obligations permitted by law to rank junior to the senior notes following the Issue Date), if any) of the Issuer, present and future and, in the case of the senior notes, *pari passu* and rateably without any preference among themselves.

Where will the Securities be traded?

Admission to trading: No application for the Securities to be admitted to trading on a regulated market has been made.

Listing: Application to trading will be made with effect from 7 July 2022 on the following multilateral trading facilities (MTF): EuroTLX managed by Borsa Italiana S.p.A. ("**EuroTLX**")

UniCredit Bank AG (the "**Market Maker**") undertakes to provide liquidity in accordance with the market making rules of EuroTLX, where the Securities are expected to be traded. Moreover, the Market Maker undertakes to apply, in normal market conditions, a spread between bid and offer quotes not higher than 1.00%.

What are the key risks that are specific to the Securities?

Credit risk of the Issuer and risks in relation to resolution measures in relation to the Issuer: The Securities constitute unsecured obligations of the Issuer vis-a-vis the Security Holders. Any person who purchases the Securities therefore relies on the creditworthiness of the Issuer and has, in relation to his/her position under the Securities, no rights or claims against any other person. Security Holders are subject to the risk of a partial or total failure of the Issuer to fulfil obligations which the Issuer is liable to perform under the Securities in whole or in part, for example, in the event of the Issuer's insolvency. The worse the creditworthiness of the Issuer is the higher is the risk of a loss. In the case of realization of the credit risk of the Issuer the Security Holder may sustain a total loss of his/her capital, even if the Securities provide for a Minimum Amount at their maturity. Moreover, Security Holders may become subject to resolution measures in relation to the Issuer if the Issuer is failing or likely to fail. The obligations of the Issuer under the Securities are not secured, guaranteed by third parties or protected by any deposit protection or compensation scheme.

Risks related to market value-influencing factors: The market value of the Securities will be affected by a number of factors. These are inter alia the creditworthiness of the Issuer, the relevant prevailing interest and yield rates, the market for similar securities, the general economic, political and cyclical conditions, the tradability and, if applicable, the remaining term of the Securities as well as additional Underlying-related market value-influencing factors. The market value of the Securities as well as the amounts distributable under the Securities primarily depend on the price of the Underlying.

Risks related to the Redemption Amount: The Redemption Amount may be less than the Issue Price or the purchase price or even be zero. A participation in a favourable performance of the Underlying beyond the Maximum Amount is excluded. **A total loss is possible.**

Risks related to a Barrier Event: If a Barrier Event occurs, a more advantageous pay-out formula will be disappplied. In any case the Security Holder may lose his invested capital in total or in part.

Risks arising from missing ongoing payments: Any Additional Conditional Amount (m) will only be payable if an Additional Conditional Amount Payment Event (m) occurs with respect to an Observation Date (m). If an Additional Conditional Amount Payment Event (m) does not occur, the Security Holder is not entitled to receive the respective Additional Conditional Amount (m). There is the risk, that in case of an unfavourable performance of the Underlying no payment of any Additional Conditional Amount (m) may occur.

Risks related to an Automatic Early Redemption: If an Early Redemption Event occurs, the Security Holder will neither participate in any future favourable performance of the Underlying nor be entitled to further payments under the Securities after an early redemption. In addition, the Security Holders are exposed to the risk that they may only reinvest the principal received due to an early repayment of the Securities to less favourable conditions.

Risks related to shares: The Securities are associated with similar risks for the Security Holders as in case of a direct investment in the shares specified as Underlying. The price of a share can fall sharply or it can become worthless, e.g. due to the insolvency of the issuer of the share.

Risks related to potential conflicts of interests: Conflicts of interest in relation to the relevant Issuer or the persons entrusted with the offer may arise, which may result in a decision to the Security Holder's disadvantage.

Liquidity risk: There is a risk that the Securities may not be widely distributed and no active trading market may exist and may develop for the Securities. The Issuer may, but is not obliged to, purchase Securities at any time and at any price in the open market, by tender offer or private agreement. Any Securities purchased in this way by the Issuer may be held, resold or cancelled. A repurchase of Securities by the Issuer may adversely affect the liquidity of the Securities. The Issuer cannot therefore assure that a Security Holder will be able to sell his Securities at an adequate price prior to their redemption.
