(1) Considering the communication received from the ECB in relation to the 2021 Supervisory Review and Evaluation Process (SREP), confirming UniCredit's Pillar 2 Capital Requirement (P2R) applicable in 2022 at 175 basis points, and the countercyclical capital buffer requirements updated as of December 2022.

What are the key risks that are specific to the Issuer?

Potential investors should be aware that in the case of the occurrence of one of the below mentioned risk factors the Securities may decline in value and that they may sustain a total loss of their investment. The following risks are key risks specific to the Issuer:

Risks associated with the impact of current macroeconomic uncertainties and the effects of the COVID-19 pandemic outbreak and recent geopolitical tensions with Russia: The financial markets and the macroeconomic and political environment of the countries in which UniCredit operates has been impacted by non-recurrent phenomena e.g.: i) Russia-Ukraine conflict and ii) the viral pneumonia known as "Coronavirus" ("COVID-19"). Both had and could continue to have a negative impact on the performance of the Group. As a matter of fact, the macroeconomic uncertainty has particularly increased due to the heightened geopolitical tension between Russian Federation and Ukraine. The Russia-Ukraine crisis has caused a sharp rise in commodities prices and inflationary pressure, further global supply-chain disruption, a tightening of financial conditions, heightened uncertainty, and a sharp drop in consumer confidence. As inflation builds up due to the increase in energy price and the supply disruptions, ECB is changing its monetary stance (Deposit Facility rate: -50 bps in June 2022, 0 bps in July, 75 bps in September, 150 bps in October, 200 bps in December, 250 bps in February 2023, 300 bps in March) and market is repricing interest rate expectations. The outlook is still surrounded by risks, further tensions on

commodity prices cannot be excluded and an upsurge in the ongoing Russia-Ukraine conflict cannot be ignored. Therefore, the expectations regarding the performance of the global economy remains still uncertain in both the short and medium term. The current environment, characterized by highly uncertain elements as above mentioned could generate a worsening of the loan portfolio quality, followed by an increase of the non-performing loans and the necessity to increase the provisions to be charged to the income statement. On 9 December 2021 UniCredit presented to the financial community its new Strategic Plan, which included a set of strategic and financial objectives that considered the underlying scenario and resulted from the assessment performed at that time. The macro assumptions underlying the Strategic Plan excluded unexpected materially adverse developments such as the Russia-Ukraine conflict and worsening of the COVID 19 pandemic, situations that UniCredit is monitoring closely (From Strategic Plan presumption: Macro assumptions in the Strategic Plan consider the recent and still existing impacts of COVID with a gradual normalization over the upcoming years. The scenario does not assume that the current COVID situation will develop in a particularly negative way in the upcoming years).

Risks connected with the Strategic Plan 2022 – 2024: On 9th December 2021, UniCredit presented to the financial community in Milan the 2022-2024 Strategic Plan called "UniCredit Unlocked" (the "**Strategic Plan**" or "**Plan**") which contains a number of strategic, capital and financial objectives (the "**Strategic Objectives**"). The Strategic Plan focuses on UniCredit's geographic areas in which the Bank currently operates; with financial performance driven by three interconnected levers: cost efficiency, optimal capital allocation and net revenue growth. "UniCredit Unlocked" delivers strategic imperatives and financial ambitions based on six pillars. Such strategic imperatives and financial ambitions regard: (i) the growth in its regions and the development of its client franchise, changing its business model and how its people operate; (ii) the delivery of economies of scale from its footprint of banks, transforming the technology, leveraging Digital & Data and embedding sustainability in all that UniCredit does; (iii) driving financial performance via three interconnected levers. The macro assumptions underlying the Strategic Plan disclosed in December 2021 excluded unexpected materially adverse developments such as the Russia-Ukraine conflict and worsening of the COVID 19 pandemic, situations that UniCredit is monitoring closely (From Strategic Plan presentation: Macro assumptions in the Strategic Plan consider the recent and still existing impacts of COVID with a gradual normalization over the upcoming years. The scenario does not assume that the current COVID situation will develop in a particularly negative way in the upcoming years). The Plan is based on six pillars: (i) optimise, through the improvement of operational and capital efficiency; (ii) invest, with targeted growth initiatives, including ESG; (iii) grow net revenues; (iv) increase return; (v) strengthen solidity thanks to revised CET1 ratio target and decrease of Gross NPE ratio; and (vi) distribute consistently with organic capital generation. UniCredit's ability to meet the strategic objectives and all forward-looking statements relies on a number of assumptions, expectations, projections and provisional data concerning future events and is hence subject to a number of uncertainties and additional factors, many of which are outside the control of UniCredit. For all these reasons, investors are cautioned against making their investment decisions based exclusively on the forecast data included in the strategic objectives. Any failure to implement the strategic objective or meet the strategic objectives may have a material adverse effect on UniCredit's business, financial condition or results of operations.

Credit risk and risk of credit quality deterioration: The activity, financial and capital strength and profitability of the UniCredit Group depend, among other things, on the creditworthiness of its customers. In carrying out its credit activities, the Group is exposed to the risk that an unexpected change in the creditworthiness of a counterparty may generate a corresponding change in the value of the associated credit exposure and give rise to the partial or total write-down thereof. The current environment continues to be characterised by highly uncertain elements, with the possibility that the slowdown of the economy, jointly with the termination of the safeguard measures, such as the customer loans moratorium, generates a worsening of the loan portfolio quality, followed by an increase of the non-performing loans and the necessity to increase the provisions to be charged to the income statement. UniCredit's Loan Loss Provisions ("**LLPs**"), excluding Russia, decreased by 36.5 per cent Y/Y to Euro 1,012 million in FY22. Therefore, the cost of risk, excluding Russia, decreased by 14 bps Y/Y to 23 bps in FY22. As at 31 December 2022, Group gross NPE ratio, excluding Russia, was equal to 2.6 per cent, decreasing compared to 30 September 2022 in which the gross NPE ratio was equal to 2.8 per cent. As at 31 December 2022 Group Net NPE ratio, excluding Russia, stable compared to 30 September 2022 and is equal to 1.4 per cent. The Group has adopted procedures, rules and principles aimed at monitoring and managing credit risk at both individual counterparty and portfolio level. However, there is the risk that, despite these credit risk monitoring and management activities, the Group's credit exposure may exceed predetermined risk's levels pursuant to the procedures, rules and principles it has adopted.

Liquidity Risk: Liquidity risk refers to the possibility that the UniCredit Group may find itself unable to meet its current and future, anticipated and unforeseen cash payment and delivery obligations without impairing its day-to-day operations or financial position. The activity of the UniCredit Group is subject in particular to funding liquidity risk, market liquidity risk, mismatch risk and contingency risk. The most relevant risks that the Group may face are: i) an exceptionally high usage of the committed and uncommitted lines granted to corporate customers; ii) an unusual withdrawal of sight deposits by UniCredit's retail and corporate customers; iii) the decline in the market value of the securities in which UniCredit invests its liquidity buffer; iv) the capacity to roll over the expiring wholesale funding and the potential cash or collateral outflows the Group may suffer in case of rating downgrades of both the banks or the sovereign debt in the geographies in which it operates. In addition to this, some risks may arise from the limitations applied to the cross-border lending among banks. Due to the financial market crisis, followed also by the reduced liquidity available to operators in the sector, the ECB has implemented important interventions in monetary policy, such as the "Targeted Longer-Term Refinancing Operation" ("**TLTRO**") introduced in 2014 and the TLTRO II introduced in 2016. It is not possible to predict the extension of the duration and the amounts with which these liquidity support operations can be repeated in the future, with the result that it is not possible to exclude a reduction or even the cancellation of this support. This would result in the need for banks to seek alternative sources of borrowing, without ruling out the difficulties of obtaining such alternative funding as well as the risk that the related costs could be higher. Such a situation could therefore adversely affect UniCredit's business, operating results and the economic and financial position of UniCredit and/or the Group. The main indicators used by the UniCredit Group to assess its liquidity profile are (i) the Liquidity Coverage Ratio (LCR), which represents an indicator of short-term liquidity subject to a minimum regulatory requirement of 100 per cent from 2018 and which was equal to 161 per cent in December 2022, whereas at 31 December 2021 was equal to 182 per cent (calculated as the average of the 12 latest end of month ratios), and (ii) the Net Stable Funding Ratio (NSFR), which represents the indicator of structural liquidity and which in December 2022 was above the internal limit set at 102 per cent, as at 31 December 2021, within the risk appetite framework.

Basel III and Bank Capital Adequacy: The Issuer shall comply with the revised global regulatory standards ("**Basel III**") on bank capital adequacy and liquidity, which impose requirements for, inter alia, higher and better-quality capital, better risk coverage, measures to promote the build-up of capital that can be drawn down in periods of stress and the introduction of a leverage ratio as a backstop to the risk-based requirement as well as two global liquidity standards. In terms of banking prudential regulations, the Issuer is also subject to the Bank Recovery and Resolution Directive 2014/59/EU of 15 May 2014 ("**BRRD**"), implemented in Italy with the Legislative Decree. 180 and 181 of 16 November 2015 as amended by Directive (EU) 2019/879, the "**BRRD II**" (implemented in Italy by the Legislative Decree No. 193 of November 8, 2021), as well as the relevant technical standards and guidelines from EU regulatory bodies (i.e. the European Banking Authority (EBA)), which, inter alia, provide for recovery and resolution mechanisms and Minimum Requirement for Own Funds and Eligible Liabilities (MREL) for credit institutions. Should UniCredit not be able to meet the capital/MREL requirements imposed by the applicable laws and regulations, it may be required to maintain higher levels of capital/eligible liabilities which could potentially impact its credit ratings, and funding conditions and which could limit UniCredit's growth opportunities.

Section 3 – Key information on the Securities

What are the main features of the Securities?

Product Type, Underlying and form of the Securities

Product Type: Garant Cash Collect Securities

Underlying: ENI S.p.A. (ISIN: IT0003132476 / Reference Price: Prezzo di Riferimento)

The Securities are governed by Italian law. The Securities are debt instruments in dematerialized registered form pursuant to the Italian Consolidated Law on Financial Intermediation (*Testo Unico della Finanza*). The Securities will be represented by book entry and registered in the books of the Clearing System. The transfer of the Securities operates by registration on the relevant accounts opened in the Clearing System. The international securities identification number (ISIN) of the Securities is set out in Section 1.

Issuance and Nominal Amount

The Securities will be issued on 12 September 2023 in Euro (EUR) (the "**Specified Currency**"), with a Nominal Amount of EUR 1,000.00 per Security (the "**Nominal Amount**").

General

The value of the Securities during their term depends mainly on the price of the Underlying. In principle, the value of the Securities rises if the price of the Underlying rises and falls if the price of the Underlying falls.

Interest

The Securities do not bear interest.

Additional Amount

Provided that no Conversion Event has occurred, the Security Holder will receive an Additional Conditional Amount (m) subject to the following conditions:

- If with respect to an Observation Date (m) an Additional Conditional Amount Payment Event (m) has occurred, an Additional Conditional Amount (m) is paid on the respective Additional Conditional Amount Payment Date (m), less all Additional Conditional Amounts (m) paid on the preceding Additional Conditional Amount Payment Dates (m).
- If with respect to an Observation Date (m) no Additional Conditional Amount Payment Event (m) has occurred, no Additional Conditional Amount (m) is paid on the respective Additional Conditional Amount Payment Date (m).

An Additional Conditional Amount Payment Event (m) occurs, if R (m) on an Observation Date (m) is equal to or greater than the respective Additional Conditional Amount Payment Level (m).

Additional Conditional Amount Payment Level (m) means the respective Additional Conditional Amount Payment Factor (m) multiplied by R (initial).

R (m) means the Reference Price on the respective Observation Date (m).

Additional Conditional Amount Payment Factor (m):	100% (1), 100% (2), 100% (3), 100% (4), 100% (5), 100% (6), 100% (7), 100% (8), 100% (9), 100% (10)
Additional Conditional Amount (m):	EUR 23.50 (1), EUR 47.00 (2), EUR 70.50 (3), EUR 94.00 (4), EUR 117.50 (5), EUR 141.00 (6), EUR 164.50 (7), EUR 188.00 (8), EUR 211.50 (9), EUR 235.00 (10)
Additional Conditional Amount Payment Date (m):	12 March 2024 (1), 12 September 2024 (2), 12 March 2025 (3), 12 September 2025 (4), 12 March 2026 (5), 14 September 2026 (6), 12 March 2027 (7), 13 September 2027 (8), 13 March 2028 (9), 12 September 2028 (10)
Observation Date (m):	5 March 2024 (1), 5 September 2024 (2), 5 March 2025 (3), 5 September 2025 (4), 5 March 2026 (5), 7 September 2026 (6), 5 March 2027 (7), 6 September 2027 (8), 6 March 2028 (9), 5 September 2028 (10)
Record Date (m):	11 March 2024 (1), 11 September 2024 (2), 11 March 2025 (3), 11 September 2025 (4), 11 March 2026 (5), 11 September 2026 (6), 11 March 2027 (7), 10 September 2027 (8), 10 March 2028 (9), 11 September 2028 (10)

Redemption

Provided that no Conversion Event has occurred, the Securities will be redeemed on the Final Payment Date at the Redemption Amount following an automatic exercise.

At the Final Payment Date the Redemption Amount is equal to the Minimum Amount.

Additional definitions and product terms

R (initial) means the Reference Price on the Initial Observation Date.

Final Payment Date:	12 September 2028
Initial Observation Date:	11 September 2023
Minimum Amount:	EUR 1,000.00
Optional Redemption Amount:	Nominal Amount

Conversion of the Securities by the Issuer: Upon the occurrence of one or more conversion events (e.g. the price quotation of the Underlying on the respective Relevant Exchange is finally ceased and no Replacement Exchange could be determined) (the "**Conversion Event**") the Issuer may convert the Securities and redeem them on the Final Payment Date by payment of the Settlement Amount. The "**Settlement Amount**" is the market value of the Securities, with accrued interest for the period until the Final Payment Date at the market rate of interest being traded at such time for liabilities of the Issuer with the same remaining term as the Securities within ten Banking Days following the occurrence of the Conversion Event, as determined by the Calculation Agent. The Settlement Amount is in any case not less than the Minimum Amount.

Early redemption at the option of the Issuer: The Securities may be redeemed at any time in whole but not in part, at the option of the Issuer at their Optional Redemption Amount on or after the date specified in a notice published on the Issuer's website on giving notice to the Paying Agent and the Security Holders, if the Issuer determines that all or part of the outstanding nominal amount of Securities is or will be excluded fully or partially from the eligible liabilities available to meet the MREL Requirements (MREL Disqualification Event).

Adjustments to the Terms and Conditions: The Calculation Agent may adjust the Terms and Conditions of the Securities (in particular the relevant Underlying and/or all prices of the Underlying which have been specified by the Calculation Agent) if an adjustment event (e.g. the company that issued the Underlying performs a corporate action) (the "**Adjustment Event**") occurs.

Status of the Securities: The obligations of the Issuer under the Securities constitute direct, unconditional, unsubordinated and unsecured obligations of the Issuer, ranking (subject to any obligations preferred by any applicable law (also subject to the bail-in instruments as implemented under Italian law)) *pari passu* with all other unsecured obligations (other than obligations ranking junior to the senior notes from time to time (including non-preferred senior notes and any further obligations permitted by law to rank junior to the senior notes following the Issue Date), if any) of the Issuer, present and future and, in the case of the senior notes, *pari passu* and rateably without any preference among themselves.

Where will the Securities be traded?

Admission to trading: No application for the Securities to be admitted to trading on a regulated market has been made.

Listing: Application to trading will be made with effect from 19 September 2023 on the following multilateral trading facilities (MTF): EuroTLX managed by Borsa Italiana S.p.A. ("EuroTLX")

UniCredit Bank AG (the "Market Maker") undertakes to provide liquidity in accordance with the market making rules of EuroTLX, where the Securities are expected to be traded. Moreover, the Market Maker undertakes to apply, in normal market conditions, a spread between bid and offer quotes not higher than 1.00%.

What are the key risks that are specific to the Securities?

Credit risk of the Issuer and risks in relation to resolution measures in relation to the Issuer: The Securities constitute unsecured obligations of the Issuer vis-a-vis the Security Holders. Any person who purchases the Securities therefore relies on the creditworthiness of the Issuer and has, in relation to his/her position under the Securities, no rights or claims against any other person. Security Holders are subject to the risk of a partial or total failure of the Issuer to fulfil obligations which the Issuer is liable to perform under the Securities in whole or in part, for example, in the event of the Issuer's insolvency. The worse the creditworthiness of the Issuer is the higher is the risk of a loss. In the case of realization of the credit risk of the Issuer the Security Holder may sustain a total loss of his/her capital, even if the Securities provide for a Minimum Amount at their maturity. Moreover, Security Holders may become subject to resolution measures in relation to the Issuer if the Issuer is failing or likely to fail. The obligations of the Issuer under the Securities are not secured, guaranteed by third parties or protected by any deposit protection or compensation scheme.

Risks related to market value-influencing factors: The market value of the Securities as well as the amounts distributable under the Securities primarily depend on the price of the Underlying. However, the market value of the Securities will be affected by a number of additional factors. These are inter alia the creditworthiness of the Issuer, the relevant prevailing interest and yield rates, the market for similar securities, the general economic, political and cyclical conditions, the tradability and, if applicable, the remaining term of the Securities as well as additional Underlying-related market value-influencing factors.

Risks related to the Redemption Amount: The Securities will be redeemed at their maturity at the Redemption Amount. The Redemption Amount may be less than the purchase price. This means, the Security Holder only achieves a return if the Redemption Amount exceeds the individual purchase price of the Security Holder.

Risks arising from missing ongoing payments: Any Additional Conditional Amount (m) will only be payable if an Additional Conditional Amount Payment Event (m) occurs with respect to an Observation Date (m). If an Additional Conditional Amount Payment Event (m) does not occur, the Security Holder is not entitled to receive the respective Additional Conditional Amount (m). There is the risk, that in case of an unfavourable performance of the Underlying no payment of any Additional Conditional Amount (m) may occur.

Risks related to shares: The Securities are associated with similar risks for the Security Holders as in case of a direct investment in the shares specified as Underlying. The price of a share can fall sharply or it can become worthless, e.g. due to the insolvency of the issuer of the share.

Risks related to potential conflicts of interests: Conflicts of interest in relation to the relevant Issuer or the persons entrusted with the offer may arise, which may result in a decision to the Security Holder's disadvantage.

Liquidity risk: There is a risk that the Securities may not be widely distributed and no active trading market may exist and may develop for the Securities. The Issuer may, but is not obliged to, purchase Securities at any time and at any price in the open market, by tender offer or private agreement. Any Securities purchased in this way by the Issuer may be held, resold or cancelled. A repurchase of Securities by the Issuer may adversely affect the liquidity of the Securities. The Issuer cannot therefore assure that a Security Holder will be able to sell his Securities at an adequate price prior to their redemption.
