What are the key risks that are specific to the Issuer?	
<p>Potential investors should be aware that in the case of the occurrence of one of the below mentioned risk factors the Notes may decline in value and that they may sustain a total loss of their investment.</p> <p>The following risks are key risks specific to the Issuer:</p>	
<p>Risks associated with the impact of current macroeconomic uncertainties and the effects of the geopolitical tensions</p> <p>The market environment in which UniCredit operates continues to be affected by high levels of uncertainty for both the short and the medium-term outlook. The economic consequences stemming from the geopolitical tension are continuing to unfold increasing uncertainty for the euro area economy, pushing up inflationary pressures, that could impact on the performance of the Group. The Russia-Ukraine crisis has caused a sharp rise in commodities prices, further global supply-chain disruption, a tightening of financial conditions, heightened uncertainty, and a sharp drop in consumer confidence. As inflation builds up due to the increase in energy price and the supply disruptions, ECB is changing its monetary stance (Deposit Facility rate: -50 bps in June 2022, 0 bps in July, 75 bps in September, 150 bps in October, 200 bps in December, 250 bps in February 2023, 300 bps in March, 325 bps in May, 350 bps in June, 375 bps in July) and market is repricing interest rate expectations. The outlook is still surrounded by risks, further tensions on commodity prices cannot be excluded and an upsurge in the ongoing Russia-Ukraine conflict cannot be ignored. Therefore, the expectations regarding the performance of the global economy remains still uncertain in both the short and medium term. The current environment, characterized by highly uncertain elements as above mentioned could generate a worsening of the loan portfolio quality, followed by an increase of the non-performing loans and the necessity to increase the provisions to be charged to the income statement. On 9 December 2021 UniCredit presented to the financial community the 2022-2024 Strategic Plan, which included a set of strategic and financial objectives that considered the underlying scenario and resulted from the assessment performed at that time.</p> <p>The macro assumptions underlying the Strategic Plan excluded unexpected materially adverse developments such as the Russia-Ukraine conflict and worsening/resurgence of the COVID-19 pandemic, situations that UniCredit has been monitoring closely (From Strategic Plan presentation: Macro assumptions in the Strategic Plan consider the recent and existing impacts of COVID-19 at the time of the Plan presentation with a gradual normalization over the subsequent years. The scenario did not assume that the COVID-19 situation at that time would develop in a particularly negative way in the subsequent years).</p>	
<p>Risks connected with the Strategic Plan 2022 – 2024</p> <p>On 9 December 2021, UniCredit presented to the financial community in Milan the 2022-2024 Strategic Plan called "UniCredit Unlocked" (the Strategic Plan or Plan) which contains a number of strategic, capital and financial objectives (the Strategic Objectives). The Strategic Plan focuses on UniCredit's geographic areas in which the Bank currently operates, with financial performance driven by three interconnected levers: cost efficiency, optimal capital allocation and net revenue growth. "UniCredit Unlocked" delivers strategic imperatives and financial ambitions based on six pillars. Such strategic imperatives and financial ambitions regard: (i) the growth in its regions and the development of its client franchise, changing its business model and how its people operate; (ii) the delivery of economies of scale from its footprint of banks, transforming the technology, leveraging Digital & Data and embedding sustainability in all that UniCredit does; (iii) driving financial performance via three interconnected levers.</p> <p>The macro assumptions underlying the Strategic Plan disclosed in December 2021 excluded unexpected materially adverse developments such as the Russia-Ukraine conflict and worsening/resurgence of the COVID-19 pandemic, situations that UniCredit has been monitoring closely (From Strategic Plan presentation: Macro assumptions in the Strategic Plan consider the recent and existing impacts of COVID-19 at the time of the Plan presentation with a gradual normalization over the subsequent years. The scenario did not assume that the COVID-19 situation at that time would develop in a particularly negative way in the subsequent years). The Plan is based on six pillars: (i) optimise, through the improvement of operational and capital efficiency; (ii) invest, with targeted growth initiatives, including ESG; (iii) grow net revenues; (iv) increase return; (v) strengthen solidity thanks to revised CET1 ratio target and decrease of Gross NPE ratio; and (vi) distribute consistently with organic capital generation. UniCredit's ability to meet the Strategic Objectives and all forward-looking statements relies on a number of assumptions, expectations, projections and provisional data concerning future events and is hence subject to a number of uncertainties and additional factors, many of which are outside the control of UniCredit. For all these reasons, investors are cautioned against making their investment decisions based exclusively on the forecast data included in the Strategic Objectives. Any failure to implement the Strategic Objective or meet the Strategic Objectives may have a material adverse effect on UniCredit's business, financial condition or results of operations.</p>	
<p>Credit risk and risk of credit quality deterioration</p> <p>The activity, financial and capital strength and profitability of the UniCredit Group depend, among other things, on the creditworthiness of its customers. In carrying out its credit activities, the Group is exposed to the risk that an unexpected change in the creditworthiness of a counterparty may generate a corresponding change in the value of the associated credit exposure and give rise to the partial or total write-down thereof. The current environment continues to be characterised by highly uncertain elements, with the possibility that the slowdown of the economy, jointly with the termination of the safeguard measures, such as the customer loans</p>	

moratorium, generates a worsening of the loan portfolio quality, followed by an increase of the non-performing loans and the necessity to increase the provisions to be charged to the income statement.

UniCredit's Loan Loss Provisions (**LLPs**) decreased by 77.5 per cent Q/Q and increased Y/Y to Euro 21 million in 2Q23. Therefore, the cost of risk decreased by 6 bps Q/Q and increased by 2 bps Y/Y to 2 bps in 2Q23. The Group kept the amount of overlays on performing exposures flat Q/Q at circa Euro 1.8 billion, which substantially reinforces the Group's capacity to withstand macroeconomic shocks. As at 30 June 2023, Group gross NPEs were down by 13.0 per cent Y/Y and by 3.9 per cent Q/Q to Euro 12.1 billion in 2Q23 (while as at 31 March 2023 they were equal to Euro 12.6 billion) with gross NPE ratio of 2.6 per cent. (- 0.3 p.p. Y/Y, - 0.1 Q/Q). As at 30 June 2023, Group Net NPEs stood at Euro 6.3 billion decreased compared to 31 March 2023 which attested at Euro 6.5 billion (Group Net NPE ratio stable compared to 31 March 2023 and is equal to 1.4 per cent.).

UniCredit's LLPs in 1H23 amounted to Euro 114 million decreased by 91.1 per cent H/H. Therefore the CoR was equal to 5 bps.

The Group has adopted procedures, rules and principles aimed at monitoring and managing credit risk at both individual counterparty and portfolio level. However, there is the risk that, despite these credit risk monitoring and management activities, the Group's credit exposure may exceed predetermined risk's levels pursuant to the procedures, rules and principles it has adopted.

Liquidity Risk

Liquidity risk refers to the possibility that the UniCredit Group may find itself unable to meet its current and future, anticipated and unforeseen cash payment and delivery obligations without impairing its day-to-day operations or financial position. The activity of the UniCredit Group is subject in particular to funding liquidity risk, market liquidity risk, mismatch risk and contingency risk. The most relevant risks that the Group may face are: i) an exceptionally high usage of the committed and uncommitted lines granted to corporate customers; ii) an unusual withdrawal of sight and term deposits by UniCredit's retail and corporate customers; iii) the decline in the market value of the securities in which UniCredit invests its liquidity buffer; iv) the capacity to roll over the expiring wholesale funding and the potential cash or collateral outflows the Group may suffer in case of rating downgrades of both the banks or the sovereign debt in the geographies in which it operates. In addition to this, some risks may arise from the limitations applied to the cross-border lending among banks. Due to the financial market crisis, followed also by the reduced liquidity available to operators in the sector, the ECB has implemented important interventions in monetary policy, such as the "Targeted Longer-Term Refinancing Operation" (**TLTRO**) introduced in 2014 and the **TLTRO II** introduced in 2016.

These liquidity support operations are approaching their maturity. This would result in the need for banks to seek alternative sources of borrowing, without ruling out the difficulties of obtaining such alternative funding as well as the risk that the related costs could be higher. Such a situation could therefore adversely affect UniCredit's business, operating results and the economic and financial position of UniCredit and/or the Group.

The main indicators used by the UniCredit Group to assess its liquidity profile are (i) the Liquidity Coverage Ratio (**LCR**), which represents an indicator of short-term liquidity subject to a minimum regulatory requirement of 100 per cent from 2018 and which was equal to 160 per cent in June 2023, whereas at 31 December 2022 was equal to 161 per cent (calculated as the average of the 12 latest end of month ratios), and (ii) the Net Stable Funding Ratio (**NSFR**), which represents the indicator of structural liquidity and which in June 2023 was above the internal limit set at 102.3 per cent within the risk appetite framework.

Basel III and Bank Capital Adequacy

The Issuer shall comply with the revised global regulatory standards (Basel III) on bank capital adequacy and liquidity, which impose requirements for, inter alia, higher and better-quality capital, better risk coverage, measures to promote the build-up of capital that can be drawn down in periods of stress and the introduction of a leverage ratio as a backstop to the risk-based requirement as well as two global liquidity standards. In terms of banking prudential regulations, the Issuer is also subject to the Bank Recovery and Resolution Directive 2014/59/EU of 15 May 2014 (BRRD), implemented in Italy with the Legislative Decree. 180 and 181 of 16 November 2015 as amended by Directive (EU) 2019/879, the "BRRD II" (implemented in Italy by the Legislative Decree No. 193 of November 8, 2021), as well as the relevant technical standards and guidelines from EU regulatory bodies (i.e. the European Banking Authority (**EBA**)), which, inter alia, provide for recovery and resolution mechanisms and Minimum Requirement for Own Funds and Eligible Liabilities (**MREL**) for credit institutions.

Should UniCredit not be able to meet the capital/MREL requirements imposed by the applicable laws and regulations, it may be required to maintain higher levels of capital/eligible liabilities which could potentially impact its credit ratings, and funding conditions and which could limit UniCredit's growth opportunities.

Where will the Notes be traded?

Application has been made by the Issuer (or on its behalf) for the Notes to be listed on the Electronic Bond Market organised and managed by Borsa Italiana S.p.A. (MOT).

What are the key risks that are specific to the Notes?

There are certain risks associated with investing in the Notes. These risks include:

Limited Events of Default and remedies

The circumstances upon which the Noteholders may declare the Notes to be immediately due and payable are limited: in particular, if the Issuer is subject to *Liquidazione Coatta Amministrativa*. In this case, the right of acceleration of principal can be restricted and the sole remedy available to Noteholders for recovery of amounts owing in respect of any of the Notes will be the institution of proceedings to enforce such payment. Notwithstanding the foregoing, the Issuer will not, by virtue of the institution of any such proceedings, be obliged to pay any sum or sums sooner than the same would otherwise have been payable by it;

Restricted early redemption and purchase

Any early redemption or purchase of Notes is subject to compliance by the Issuer with any conditions to such redemption or repurchase prescribed by the then applicable relevant regulations, including any requirements applicable to such redemption or repurchase due to the qualification of such Notes at such time as eligible liabilities available to meet the MREL or TLAC Requirements, the prior approval of the Relevant Resolution Authority where applicable from time to time under the applicable Relevant Regulation or the decision of the Issuer of not exercising the option to redeem the Notes. In addition, the Issuer has the right to redeem all Notes upon the occurrence of a MREL or TLAC Disqualification Event, and there can be no assurance that Noteholders will be able to reinvest the amounts received upon redemption at a rate that will provide the same rate of return as their investment in the Notes;

Modification without Noteholders' consent

In case of MREL or TLAC Disqualification Event or to enforce the provisions related to the statutory bail-in power, the Issuer may, subject to giving any notice required to be given to, and receiving any consent required from the Competent Authority and/or as appropriate the Relevant Resolution Authority, vary the terms of the Notes and in such case no assurance can be given as to whether any of these changes will negatively affect any particular Noteholder;

Application of the general bail-in tool

The Notes may be subject to write-down or conversion into equity capital instruments on any application of the general bail-in tool, which may result in the relevant holders losing some or all of their investment. The exercise of the general bail-in tool, or any other power under the BRRD or any suggestion or perceived suggestion of such exercise could, therefore, materially adversely affect the rights of holders of the Notes, the price or value of their investment in any such Notes and/or the ability of the Issuer to satisfy its obligations under such Notes;

Dematerialised Notes

In no circumstances would physical documents of title be issued in respect of the Notes issued in dematerialised form. While the Notes are represented by book entries, investors will be able to trade their beneficial interests only through Monte Titoli and the authorised financial intermediaries holding accounts on behalf of their customers with Monte Titoli. As the Notes are held in dematerialised form with Monte Titoli, investors will have to rely on the procedures of Monte Titoli and the financial intermediaries authorised to hold accounts therewith, for transfer, payment and communication to the Issuer;

Waiver of set-off

As a result of the waiver of set-off, each Noteholder unconditionally and irrevocably waives to any right of set-off, netting, counterclaim, abatement or other similar remedy which it might otherwise have, under the laws of any jurisdiction or otherwise, in respect of such Note;

Changes in Italian laws or administrative practice

Changes in Italian laws or administrative practice and/or any judicial decision could materially adversely impact the value of any Notes affected by it;

Risks related to the market generally

Credit ratings may not reflect the potential impact of all risks related to structure, market, additional factors discussed above, and other factors that may affect the value of the Notes. The Issue Price of the Notes includes implicit fees that may not be taken into account for the purposes of determining the price of the Notes in the

secondary market and could result in a difference between the Issue Price, the theoretical value of the Notes and/or the actual bid/offer price quoted by any intermediary in the secondary market. Any such difference may have an adverse effect on the value of the Notes, particularly immediately following the offer and the issue date relating to such Notes, where any such fees may be deducted from the price at which such Notes can be sold by the initial investor in the secondary market. In addition, an active secondary market in respect of the Notes may never be established or may be illiquid and this would adversely affect the value at which an investor could sell his Notes. Therefore, investors may not be able to sell their Notes easily or at prices that will provide them with a yield comparable to similar investments that have a developed secondary market. Furthermore, if an investor holds Notes which are not denominated in the investor's home currency, it will be exposed to movements in exchange rates adversely affecting the value of its holding. In addition, the imposition of exchange controls in relation to any Notes could result in an investor not receiving payments on those Notes. Moreover, the repayment of the nominal amount of the Notes at maturity does not protect investors from the risk of inflation. Consequently, the real return of the Notes, which is the adjusted return taking into account the inflation rate measured during the life of the Notes themselves, could be negative. In addition, the Notes are subscribed by the an affiliate of the Issuer for resales on the secondary market thereafter on the basis of investors' demand. Accordingly, in these cases investors purchasing the Notes should be aware that there may not be a liquid secondary market for the relevant Notes immediately. Even if a market does develop subsequently, it may not be liquid. Furthermore, investors should note that when subscribing the Notes the Dealer may receive in consideration underwriting commissions and selling concessions. In addition, the Issuer or one of its affiliates may act market maker, liquidity provider or specialist or perform other similar roles in connection with the Notes, including *inter alia* acting as intermediary performing the investment service of execution of orders; in such cases, the Issuer or one of its affiliates can purchase the Notes issued by itself. In light of the above, circumstances potential conflicts of interest may exist between the Issuer and/or its affiliates acting in such capacity of owners/holders of the Notes and/or market maker, liquidity provider or specialist or intermediary on the one hand and investors in the Notes on the other. The relevant market maker, liquidity provider or specialist may act by virtue of agreements entered into with the Issuer and/or the Dealer/Distributor, pursuant to which such subjects undertake to sell the Notes on the secondary market at a price calculated on the basis of predetermined conditions and/or for a maximum predetermined quantity. Where the liquidity of the Notes is supported by one or more subjects operating on the secondary market, there is a risk that the purchase price of the Notes is influenced in a prevalent manner by the activity of such subjects if the purchase price is formulated on the basis of pre-determined criteria; in such a case, in fact, the price may not reflect all the market variables and may not be indicative of the same and may, therefore, be different than the price that would have been determined independently on the market. The Issuer reserves the right to cancel some or all of the Notes held by the Issuer itself or by re-purchasing them from the relevant Dealer at any time prior to the final maturity of the Notes. Accordingly, the aggregate nominal amount or number of Notes outstanding at any time may be significantly less than the nominal amount outstanding on the Issue Date, and this could have a negative impact on the investor's ability to sell the Notes in the secondary market. While this risk applies to all Notes, it may be particularly the case with regard to Notes intended to be/or listed on Borsa Italiana S.p.A. and admitted to trading on the MOT.

Why is this prospectus being produced?

Reasons for the offer and use of proceeds: for its general corporate purposes, which include making a profit.

Indication of most material conflicts of interest pertaining to the offer or the admission to trading: Save for the fees payable to the Specialist, also acting as arranger of the Notes, and save for the fact that the Specialist is part of the Issuer's Group, so far as the Issuer is aware, no person involved in the issue of the Notes has an interest material to the offer. Furthermore, the Specialist is the Dealer, distributor on secondary market, calculation agent and market maker in connection with the Notes. The Specialist and its affiliates have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform other services for, the Issuer and its affiliates in the ordinary course of business.
