What are the key risks that are specific to the Issuer?

Potential investors should be aware that in the case of the occurrence of one of the below mentioned risk factors the Securities may decline in value and that they may sustain a total loss of their investment. The following risks are key risks specific to the Issuer:

Risks associated with the UniCredit Group's activities in different geographical areas: Despite the Group's business being materially connected to Italy and, therefore, to the state of its economy (Italy accounted for approximately 44% of the Group's revenues in 1H25, computed as sum of Italy, Germany, Austria, Central & Eastern Europe and Russia) the UniCredit Group is also present in Germany (accounting for approximately 22% of the Group's revenues in 1H25), in Austria (accounting for approximately 10% of the Group's revenues), in Central & Eastern Europe (accounting for approximately 18% and covering Czech Republic and Slovakia, Hungary, Slovenia, Croatia, Bulgaria, Romania, Bosnia & Herzegovina and Serbia). UniCredit also has marginal activities in Russia (accounting for approximately 5% of the Group's revenues in 1H25). The exposure to which has been reduced (including over the first quarter of 2025), since the start of the Ukrainian crisis. The UniCredit Group's geographical spread will also continue to expose it to risks and uncertainties of a varying nature and magnitude affecting each of the various countries in which it operates and which could be more complex in relation to countries outside the European Union. Central and eastern European countries in particular have historically experienced volatile capital and foreign exchange markets, often coupled with political, economic and financial instability (at present potentially increased due to the Ukrainian crisis). The evolution of the geopolitical landscape remains under continuous monitoring by UniCredit, with current factors including recent and constantly evolving U.S. trade policy decisions, that could have potential implications on global trade relationships both with upsides (e.g. new trade partnerships) and downsides (e.g. impact on export/import) as possible outcomes. This area is at the early stage of evolution and potential impacts, if any, on UniCredit's primary geographies will be duly taken into account as part of the normal processes of the risk management framework. At the date of the Registration Document, the Issuer's presence in Russia exposes it to the specific risks connected to the ongoing Ukrainian crisis. Such risk exposure also requires the Issuer to constantly employ a significant amount of resources for the dynamic management of risks and ongoing assessment of the possible effects of the geopolitical crisis, while maintaining an overall prudent and sustainable approach to distributions. With regard to the assets and liabilities of Russian subsidiaries, the Group holds investments in Russia through AO UniCredit Bank and its subsidiaries OOO UniCredit Garant, and OOO UniCredit Leasing. The line-by-line consolidation determined the recognition of total assets for Euro 6,306 million vs. Euro 5,597 million as at 31 December 2024, mainly attributable to a change in financial assets at amortised cost for the application of the updated exchange rate.

As at 30 June 2025, the revaluation reserves, whose treatment envisages the recycling through P&L in case of derecognition of the associated assets and liabilities, are equal to Euro -2,624 million mainly arising from the foreign exchange revaluation reserve resulting from the conversion of assets and liabilities of these companies in EUR; the positive delta for Euro 697 million vs. year-end 2024 (Euro -3,321 million), is mainly due the appreciation of the Russian Ruble over the period.

As of 2Q2025 the loss of control over AO UniCredit Bank would determine the derecognition of net assets having a carrying value of Euro 6,426 million (also embedding the negative revaluation reserves), with a correspondent negative effect through P&L, in case the events leading to the derecognition would not envisage cash-in receivables; under a regulatory perspective over CET1 capital, the negative effect related to the revaluation Reserves (Euro -2,624 million) is basically neutral since it is already considered according to its nature and sign (also taking into account regulatory filters). In the first half 2025, the consolidated carrying value of AO UniCredit Bank has increased, as an effect of the results of the Bank and of the appreciation of the Russian Ruble. The extreme loss scenario impact on UniCredit CET1 ratio as of June 2025 is equal to -78bps or -88bps including impact from threshold

deduction, if this were applicable at the time the event occurs.

Credit risk and risk of credit quality deterioration: The financial and capital strength, as well as the profitability of the UniCredit Group also depend on the creditworthiness of its customers. An unexpected change in the creditworthiness of a counterparty exposes the Group to the risk of a change in the value of the associated credit exposure, requiring it to be partially or totally written down. Such credit risk is inherent in, and material to, the traditional activity of providing credit. As at June 30, 2025, the value of the UniCredit Group's non-performing exposures ("NPEs") was equal to Euro 11.7 billion (with a gross NPE ratio of 2.6%), stable Y/Y; the stock of loan loss provisions ("LLPs") was equal to Euro 5.3 billion with a coverage ratio of 45.4%. As at June 30, 2025, the Group's net NPEs stood at Euro 6.4 billion (equal to 1.5% of total exposures of the Group). The UniCredit Group's CoR stood at 9 bps as at June 30, 2025 and Group's overlays on performing exposures was approximately Euro 1.7 billion. The UniCredit Group is also exposed to the non-traditional counterparty credit risk arising in the context of negotiations of derivative contracts and repurchase transactions (repos) on a wide range of products if a counterparty becomes unable to fulfil its obligations towards the UniCredit Group.

Risks associated with the exposure of the UniCredit Group to sovereign debt: The book value of sovereign debt securities exposures of the UniCredit Group as at June 30, 2025 amounted to Euro 129,983 million (Euro 116,130 million as at December 31, 2024) of which more than 74% is concentrated in eight countries: Italy (Euro 47,626 million), Spain (Euro 17,252 million), Germany (Euro 8,148 million), France (Euro 7,842 million), Czech Republic (Euro 4,284 million), Austria (Euro 4,156 million), United States of America (Euro 4,023 million) and Romania (Euro 3,108 million). Worsening of the spread between the return on government bonds and risk-free benchmark rates, downgrading of a sovereign entity's rating might impact negatively the value of UniCredit's securities portfolio may be detrimental to the capital position and operating results of the Issuer, although there were no indications of defaults over the course of 2025. The Group's sovereign debt exposure to Russia (Euro 763 million, as of June 30, 2025) is almost totally held by the Russian controlled bank in local currency and accordingly classified in the banking book.

In addition to the exposures to sovereign debt securities, loans given to central and local governments and governmental bodies must be taken into account, amounting to Euro 27,617 million as at June 30, 2025 (as at 31 December 2024 it amounted to Euro 26,515 million).

Liquidity risk: The UniCredit Group is and will be exposed to the possibility of being unable to meet its current and future, anticipated and unforeseen cash payment and delivery obligations without impairing its day-to-day operations or financial position. The liquidity risks specific to the activities of UniCredit concern funding/market liquidity and mismatch/contingency risks. As of December 31, 2024, the Liquidity Coverage Ratio (LCR) of the UniCredit Group was equal to 144% whereas at December 31, 2023 it was equal to 154% (calculated as the average of the 12 latest end of month ratios). As of December 31, 2024, the Net Stable Funding Ratio (NSFR) was above 128%. The regulatory liquidity indicators as at June 30, 2025 were as follows: (i) LCR above 140%, (ii) preliminary NSFR above 125% and (iii) Loan to Deposit Ratio equal to 88%.

Risks associated with capital adequacy requirements: Following the results of the SREP 2024, capital requirements to be met by UniCredit involve a P2R at 200 bps (minimum of 1.13% as CET1 capital and 1.50% as Tier 1 capital), a leverage ratio (P2R-LR) of zero and no additional liquidity requirements. As of June 2025, UniCredit is required to keep: (i) OCR at 10.46% in terms of CET1, at 12.34% in terms of Tier 1, and at 14.84% in terms of Total Capital, and (ii) OLRR at 3% on a consolidated basis. As of June 30, 2025, consolidated CET1 Capital, Tier 1 and Total Capital ratios were equal to, respectively: 16.0%, 17.7% and 20.4%, while the LRE was 5.70%. All in all, the outcome of the 2024 SREP as summarized by the P2R is in line with previous years' assessment, and there are no other impacts stemming from that relating to 2024. Furthermore, following the communication received by the SRB and the Bank of Italy in April 2025, UniCredit is required to comply, on a consolidated basis, with: (i) MREL requirement equal to 22.18% of RWAs – plus the applicable Combined Buffer Requirement (the "CBR") – and 5.98% for Leverage Ratio Exposures ("LRE"); and subordinated MREL (i.e., to be met with subordinated instruments) equal to 14.49% of RWAs plus the applicable CBR – and 5.98% for the LRE.

Section 3 – Key information on the Securities

What are the main features of the Securities?

Product Type, Underlying and form of the Securities

Product Type: Cash Collect Securities with Multi-Underlying (with Cash Settlement) (with Additional Unconditional Amount (I)) (Non-Quanto Securities)

Underlying: The Underlying is a basket consisting of the following indices as Basket Component_i:

i	Basket Component _i	Reference Price _i
1	EURO STOXX 50® (Price) Index (EUR) (ISIN EU0009658145)	Closing price
2	EURO STOXX® Banks (Price) Index (EUR) (ISIN EU0009658426)	Closing price

The Securities are governed by Italian law. The Securities are debt instruments in dematerialized registered form pursuant to the Italian Consolidated Law on Financial Intermediation (*Testo Unico della Finanza*). The Securities will be represented by book entry and registered in the books of the Clearing System. The transfer of the Securities operates by registration on the relevant accounts opened in the Clearing System. The international securities identification number (ISIN) of the Securities is set out in Section 1.

Issuance and Term

The Securities will be issued on 10 October 2025 in Euro (EUR) (the "Specified Currency") as up to 49,000 Certificates. The Securities have a defined term.

General

The value of the Securities during their term depends mainly on the price of the Basket Component_i with the worst (lowest) performance. In general, if the price of the Basket Component_i with the worst performance rises, the value of the Securities rises. In general, if the price of the Basket Component_i with the worst performance falls, the value of the Securities falls.

Interest

The Securities do not bear interest.

Additional Unconditional Amount

Provided that no Call Event has occurred, the respective Additional Unconditional Amount (I) will be paid on the respective Additional Unconditional Amount Payment Date (I).

Additional Unconditional Amount (I):	EUR 40.00 (1), EUR 40.00 (2), EUR 40.00 (3), EUR 40.00 (4)
Additional Unconditional Amount Payment Date (I):	12 October 2026 (1), 11 October 2027 (2), 10 October 2028 (3), 27 December 2029 (4)
Record Date (I):	9 October 2026 (1), 8 October 2027 (2), 9 October 2028 (3), 24 December 2029 (4)

Redemption

Provided that no Call Event has occurred, the Securities will be redeemed on the Final Payment Date by payment of the Redemption Amount as follows:

- If no Barrier Event has occurred, the Redemption Amount corresponds to the Calculation Amount.
- If a Barrier Event has occurred, the Redemption Amount corresponds to the Calculation Amount multiplied by the Worst Performance (final) and divided by the Strike Level. The Redemption Amount will not be greater than the Calculation Amount.

Worst Performance (final) means with respect to the Final Observation Date, the performance of the Basket Component_i with the worst (lowest) performance. With respect to the Final Observation Date, the performance of each Basket Component_i is calculated by the Calculation Agent as K_i (final) divided by K_i (initial).

Additional definitions and product terms

A Barrier Event occurs if the Worst Performance (final) is lower than the Barrier Level on the Final Observation Date.

K_i (final) means the Reference Price_i of the Basket Component_i on the Final Observation Date.

K_i (initial) means the Reference Price_i of the Basket Component_i on the Initial Observation Date.

Barrier Level:	40%
Calculation Amount:	EUR 1,000.00
Final Observation Date:	18 December 2029
Final Payment Date:	27 December 2029
Initial Observation Date:	10 October 2025
Strike Level:	100%

Extraordinary termination right: Upon the occurrence of one or more call events (for example, the calculation of a Basket Component is permanently discontinued and no suitable Replacement Basket Component is available) (the "**Call Event**"), the Issuer may call the Securities extraordinarily and redeem the Securities at their Cancellation Amount. The "**Cancellation Amount**" is their fair market value.

Adjustments to the Terms and Conditions: The Calculation Agent may adjust the Terms and Conditions of the Securities if an adjustment event (for example, a certain change to the relevant index concept of a Basket Component) (the "**Adjustment Event**") occurs.

Status of the Securities: The obligations of the Issuer under the Securities constitute direct, unconditional, unsubordinated and unsecured obligations of the Issuer, ranking (subject to any obligations preferred by any applicable law (also subject to the bail-in instruments as implemented under Italian law)) *pari passu* with all other unsecured obligations (other than obligations ranking junior to the senior notes from time to time (including non-preferred senior notes and any further obligations permitted by law to rank junior to the senior notes following the Issue Date), if any) of the Issuer, present and future and, in the case of the senior notes, *pari passu* and rateably without any preference among themselves.

Where will the Securities be traded?

Admission to trading: No application for the Securities to be admitted to trading on a regulated market has been made.

Listing: Application to trading will be made with effect from 17 October 2025 on the following multilateral trading facilities (MTF): EuroTLX managed by Borsa Italiana S.p.A. ("**EuroTLX**")

UniCredit Bank GmbH (the "**Market Maker**") undertakes to provide liquidity in accordance with the market making rules of EuroTLX, where the Securities are expected to be traded. Moreover, the Market Maker undertakes to apply, in normal market conditions, a spread between bid and offer quotes not higher than 1.00%.

What are the key risks that are specific to the Securities?

Credit risk of the Issuer and risks in relation to resolution measures in relation to the Issuer: The Securities constitute unsecured obligations of the Issuer vis-a-vis the Security Holders. Any person who purchases the Securities therefore relies on the creditworthiness of the Issuer and has, in relation to his/her position under the Securities, no rights or claims against any other person. Security Holders are subject to the risk of a partial or total failure of the Issuer to fulfil obligations which the Issuer is liable to perform under the Securities in whole or in part, for example, in the event of the Issuer's insolvency. The worse the creditworthiness of the Issuer is the higher is the risk of a loss. In the case of realization of the credit risk of the Issuer the Security Holder may sustain a total loss of his/her capital, even if the Securities provide for a Minimum Amount at their maturity. Moreover, Security Holders may become subject to resolution measures in relation to the Issuer if the Issuer is failing or likely to fail. The obligations of the Issuer under the Securities are not secured, guaranteed by third parties or protected by any deposit protection or compensation scheme.

Risks related to market value-influencing factors: The Security Holders bear the risk that the market price of the Securities may be subject to severe fluctuations during the term of Securities and that the Security Holder is not able to sell the Securities at a specific time or for a specific price. The market value of the Securities will be affected by a number of factors. These are inter alia the creditworthiness of the Issuer, the relevant prevailing interest and yield rates, the market for similar securities, the general economic, political and cyclical conditions, the tradability and, if applicable, the remaining term of the Securities as well as additional Basket Component-related market value-influencing factors. The market value of the Securities as well as the amounts distributable under the Securities primarily depend on the price of the Basket Components.

Risks related to the Redemption Amount: The Redemption Amount may be less than the Issue Price or the purchase price or even be zero. A participation in a favourable performance of the Basket Components beyond the Calculation Amount is excluded. **A total loss is possible.**

Risks related to a Barrier Event: If a Barrier Event occurs, a more advantageous pay-out formula will be disappplied. In any case the Security Holder may lose his invested capital in total or in part.

Risks related to the regulation of benchmarks: The Securities make reference to a Benchmark (the "**Benchmark**") within the meaning of Regulation (EU) 2016/1011 (the "**Benchmark Regulation**") and therefore there is a risk that the Benchmark may not be used as reference value of the Securities from a certain point in time. In such event, the Securities could be de-listed, adjusted, converted or otherwise impacted. Any changes to a Benchmark as a result of the Benchmark Regulation could have a material adverse effect on the costs of refinancing a Benchmark or the costs and risks of administering or otherwise participating in the setting of a Benchmark and complying with the Benchmark Regulation. Potential investors should be aware that they face the risk that any changes to the relevant Benchmark may have a material adverse effect on the value of and the amount payable under the Securities.

Risks related to the Worst-of Element: Any amounts to be distributed under the Securities, are determined by reference to the price or the performance of the Basket Component with the Worst Performance only. Thus, the Security Holder faces the risk of losses due to the performance of the Basket Component with the Worst Performance, even if some or all other Basket Components perform more favourably.

Risks related to indices: The performance of Securities linked to indices depends on the performance of the respective index. Changes in the price of the components of the index and changes to the composition of the index or other factors may have an adverse effect on the performance of the index. There is a risk that the index may not be used as reference value of the Securities from a certain point in time. In such event, the Securities could be de-listed, adjusted, redeemed prior to maturity or otherwise impacted.

Risks related to potential conflicts of interests: Conflicts of interest in relation to the relevant Issuer or the persons entrusted with the offer may arise, which may result in a decision to the Security Holder's disadvantage.

Section 4 – Key information on the offer of the Securities to the public and/or the admission to trading on a regulated market
