What are the key risks that are specific to the Issuer?

Potential investors should be aware that in the case of the occurrence of one of the below mentioned risk factors the Securities may decline in value and that they may sustain a total loss of their investment.

The following risks are key risks specific to the Issuer:

Risks associated with the impact of current macroeconomic uncertainties and the effects of the COVID-19 pandemic outbreak and recent geopolitical tensions with Russia:

The financial markets and the macroeconomic and political environment of the countries in which UniCredit operates were impacted by the viral pneumonia known as "Coronavirus" (COVID-19) outbreak and this has had and could continue to have a negative impact on the performance of the Group. The valuation of certain assets has become complex and uncertain as a result of the lockdown measures and other restrictive measures put in place by governments for the containment of COVID 19 pandemic, even though progressively lifted. Moreover, macroeconomic uncertainty increased as a result of the heightened geopolitical tension between Russian Federation and Ukraine. The Russia-Ukraine crisis has caused a sharp rise in commodities prices and inflationary pressure, further global supply-chain disruption, a tightening of financial conditions, heightened uncertainty, and a sharp drop in consumer confidence. As inflation builds up as a result of the increase in energy price and the supply disruptions, ECB is changing its monetary stance and market is repricing interest rate expectations. The outlook is surrounded by risks, also related to a cessation of gas supply from Russia. As a consequence, the expectations regarding the performance of the global economy remain therefore still uncertain in both the short and medium term. The macroeconomic context in which the Group functioned in 2021 was characterized by the encouraging signs of recovery compared with the prior year, supported by the governmental measures sustaining the economy, by vaccination campaigns and by the progressive slowing-down of the lockdown measures. The current environment continues to be characterized by highly uncertain elements, such as geopolitical tensions with Russia, with the possibility that the slowdown of the economy could generate a worsening of the loan portfolio quality, followed by an increase of the non-performing loans and the necessity to increase the provisions to be charged to the income statement. On 9 December 2021 UniCredit presented to the financial community its new Strategic Plan, which included a set of strategic and financial objectives that considered the underlying scenario and resulted from the assessment performed in the previous months. The macro assumptions underlying the Strategic Plan exclude (macro assumptions consider the recent and still existing impacts of COVID with a gradual normalisation over the upcoming years. The scenario does not assume that the current COVID situation will develop in a particularly negative way in the upcoming years) unexpected materially adverse developments such as the worsening of the COVID-19 pandemic and Russia-Ukraine conflict, situations that UniCredit is monitoring closely. The evaluations processes, such as Deferred Tax Assets, whose recoverable amount depends on cash flows projections, might be subject to a change not foreseeable at the moment and from which could derive possible negative effects, including significant ones, on the bank's financial and economic situation.

Risks connected with the Strategic Plan 2022 – 2024

On 9th December 2021, UniCredit presented to the financial community in Milan the 2022-2024 Strategic Plan called “UniCredit Unlocked” (the “Strategic Plan” or “Plan”) which contains a number of strategic, capital and financial objectives (the “Strategic Objectives”). “UniCredit Unlocked” delivers strategic imperatives and financial ambitions based on six pillars. Such strategic imperatives and financial ambitions regard: (i) the growth in its regions and the development of its client franchise, changing its business model and how its people operate; (ii) the delivery of economies of scale from its footprint of banks, transforming the technology leveraging Digital & Data and embedding sustainability in all that UniCredit does; (iii) driving financial performance via three interconnecting levers. UniCredit’s ability to meet the strategic objectives and all forward-looking statements relies on a number of assumptions, expectations, projections and provisional data concerning future events and is subject to a number of uncertainties and other factors, many of which are outside the control of UniCredit. Macro assumptions exclude (macro assumptions consider the recent and still existing impacts of COVID with a gradual normalisation over the upcoming years. The scenario does not assume that the current COVID situation will develop in a particularly negative way in the upcoming years) unexpected materially adverse developments such as the worsening of the COVID-19 pandemic, a situation that UniCredit is monitoring closely. The six pillars are: (i) optimise, through the improvement of operational and capital efficiency; (ii) invest, with targeted growth initiatives, including ESG; (iii) grow net revenues; (iv) return; (v) strengthen thanks to revised CET1 ratio target and decrease of Gross NPE ratio; and (vi) distribute consistently with organic capital generation. For all these reasons, investors are cautioned against making their investment decisions based exclusively on the forecast data included in the strategic objectives. Any failure to implement the strategic objective or meet the strategic objectives may have a material adverse effect on UniCredit’s business, financial condition or results of operations.

Credit risk and risk of credit quality deterioration:

The activity, financial and capital strength and profitability of the UniCredit Group depend, among other things, on the creditworthiness of its customers. In carrying out its credit activities, the Group is exposed to the risk that an unexpected change in the creditworthiness of a counterparty may generate a corresponding change in the value of the associated credit exposure and give rise to the partial or total write-down thereof. The current environment continues to be characterised by highly uncertain elements, with the possibility that the slowdown of the economy, jointly with the termination of the safeguard measures, such as the customer loans moratorium, generates a worsening of the loan portfolio quality, followed by an increase of the non-performing loans and the necessity to increase the provisions to be charged in the income statement. UniCredit’s Loan Loss Provisions (“LLPs”), excluding Russia, increased Q/Q and decreased by 71.7 per cent Y/Y to Euro 108 million in 2Q22. Therefore, the cost of risk, excluding Russia, increased by 5 bps Q/Q and decreased by 26 bps Y/Y to 10 bps in 2Q22. As at 30 June 2022, Group gross NPE ratio, excluding Russia, was equal to 2.8 per cent, decreasing compared to 31 March 2022 in which the gross NPE ratio was equal to 3.6%. As at 30 June 2022 Group Net NPE ratio, excluding Russia, decreasing compared to 31 March 2022 and is equal to 1.5%. UniCredit’s LLPs, excluding Russia, in 1H22 amounted to Euro 161 million decreased by 69.7 per cent H/H. Therefore the CoR was equal to 7 bps. In the context of credit activities, this risk involves, among other things, the possibility that the Group’s contractual counterparties may not fulfil their payment obligations, as well as the possibility that Group companies may, based on incomplete, untrue or incorrect information, grant credit that otherwise would not have been granted or that would have been granted under different conditions. Other banking activities, besides the traditional lending and deposit activities, can also expose the Group to credit risks. “Non-traditional” credit risk can, for example, arise from: (i) entering derivative contracts; (ii) buying and selling securities currencies or goods; and (iii) holding third-party securities. The counterparties of said transactions or the issuers of securities held by Group entities could fail to comply due to insolvency, political or economic events, a lack of liquidity, operating deficiencies, or other reasons. The Group has adopted procedures, rules and principles aimed at monitoring and managing credit risk at both individual counterparty and portfolio level. However, there is the risk that, despite these credit risk monitoring and management activities, the Group’s credit exposure may exceed predetermined risk’s levels pursuant to the procedures, rules and principles it has adopted.

Liquidity Risk

The main indicators used by the UniCredit Group to assess its liquidity profile are (i) the Liquidity Coverage Ratio (LCR), which represents an indicator of short-term liquidity subject to a minimum regulatory requirement of 100% from 2018 and which was equal to 171% in June 2022, whereas at 31 December 2021 was equal to 182% (calculated as the average of the 12 latest end of month ratios), and (ii) the Net Stable Funding Ratio (NSFR), which represents the indicator of structural liquidity and which in June 2022 was above the internal limit set at 102%, as at 31 December 2021, within the risk appetite framework. Liquidity risk refers to the possibility that the UniCredit Group may find itself unable to meet its current and future, anticipated and unforeseen cash payment and delivery obligations without impairing its day-to-day operations or financial position. The activity of the UniCredit Group is subject in particular to funding liquidity risk, market liquidity risk, mismatch risk and contingency risk. The most relevant risks that the Group may face are: i) an exceptionally high usage of the committed and uncommitted lines granted to corporate customers; ii) an unusual withdrawal of sight deposits by UniCredit’s retail and corporate customers; iii) the decline in the market value of the securities in which UniCredit invests its liquidity buffer; iv) the capacity to roll over the expiring wholesale funding and the potential cash or collateral outflows the Group may suffer in case of rating downgrades of both the banks or the sovereign debt in the geographies in which it operates. In addition to this, some risks may arise from the limitations applied to the cross-border lending among banks. Due to the financial market crisis, followed also by the reduced liquidity available to operators in the sector, the ECB has implemented important interventions in monetary policy, such as the “Targeted Longer-Term Refinancing Operation” (TLTRO) introduced in 2014 and the TLTRO II introduced in 2016. It is not possible to predict the extension of the duration and the amounts with which these liquidity support operations can be repeated in the future, with the result that it is not possible to exclude a reduction or even the cancellation of this support. This would result in the need for banks to seek alternative sources of borrowing, without ruling out the difficulties of obtaining such alternative funding as well as the risk that the related costs could be higher. Such a situation could therefore adversely affect UniCredit’s business, operating results and the economic and financial position of UniCredit and/or the Group.

Basel III and Bank Capital Adequacy

The Issuer shall comply with the revised global regulatory standards (Basel III) on bank capital adequacy and liquidity, which impose requirements for, inter alia, higher and better-quality capital, better risk coverage, measures to promote the build-up of capital that can be drawn down in periods of stress and the introduction of a leverage ratio as a backstop to the risk-based requirement as well as two global liquidity standards. In terms of banking prudential regulations, the Issuer is also subject to the Bank Recovery and Resolution Directive 2014/59/EU of 15 May 2014 (BRRD), implemented in Italy with the Legislative Decree. 180 and 181 of 16 November 2015 as amended by Directive (EU) 2019/879, the “BRRD II” (implemented in Italy by the Legislative Decree No. 193 of November 8, 2021), as well as the relevant technical standards and guidelines from EU

regulatory bodies (i.e. the European Banking Authority (EBA)), which, inter alia, provide for recovery and resolution mechanisms and Minimum Requirement for Own Funds and Eligible Liabilities (MREL) for credit institutions.

Should UniCredit not be able to meet the capital/MREL requirements imposed by the applicable laws and regulations, it may be required to maintain higher levels of capital/eligible liabilities which could potentially impact its credit ratings, and funding conditions and which could limit UniCredit's growth opportunities.

What are the key risks that are specific to the Notes?

There are certain risks associated with investing in the Notes. These risks include:

Limited Events of Default and remedies

The circumstances upon which the Noteholders may declare the Notes to be immediately due and payable are limited: in particular, if the Issuer is subject to *Liquidazione Amministrativa*. In this case, the right of acceleration of principal can be restricted and the sole remedy available to Noteholders for recovery of amounts owing in respect of any of the Notes will be the institution of proceedings to enforce such payment;

Restricted early redemption and purchase

Any early redemption or purchase of Notes is subject to compliance by the Issuer with any conditions to such redemption or repurchase prescribed by the then applicable relevant regulations, including any requirements applicable to such redemption or repurchase, the prior approval of the Relevant Resolution Authority or the decision of the Issuer of not exercising the option to redeem the Notes. In addition, the Issuer has the right to redeem all Notes upon the occurrence of a MREL or TLAC Disqualification Event, and there can be no assurance that Noteholders will be able to reinvest the amounts received upon redemption at a rate that will provide the same rate of return as their investment in the Notes;

Modification without Noteholders' consent

In case of MREL or TLAC Disqualification Event or to enforce the provisions related to the statutory bail-in power, the Issuer may vary the terms of the Notes and in such case no assurance can be given as to whether any of these changes will negatively affect any particular Noteholder;

Application of the general bail-in tool

The Notes may be subject to write-down or conversion into equity capital instruments on any application of the general bail-in tool, which may result in the relevant holders losing some or all of their investment;

Waiver of set-off

As a result of the waiver of set-off each Noteholder waives to any set-off remedy which it might otherwise have, under the laws of any jurisdiction or otherwise, in respect of such Note;

Changes in Italian laws or administrative practice

Changes in Italian laws or administrative practice could materially adversely impact the value of any Notes affected by it. In addition, the Issuer cannot foresee the effect of any potential misalignment between the laws applicable to the Terms and Conditions of the Notes and the Global Notes and the laws applicable to their transfer and circulation for any prospective investors in the Notes and any disputes which may arise in relation to, inter alia, the transfer of ownership in the Notes;

Risks related to the market generally

Credit ratings assigned to the Issuer may not reflect all the risks associated with an investment in those Notes. In addition, an active secondary market in respect of the Notes may never be established or may be illiquid and this would adversely affect the value at which an investor could sell his Notes. Therefore investors may not be able to sell their Notes easily or at prices that will provide them with a yield comparable to similar investments that have a developed secondary market. Finally, if an investor holds Notes which are not denominated in the investor's home currency, it will be exposed to movements in exchange rates adversely affecting the value of its holding. In addition, the imposition of exchange controls in relation to any Notes could result in an investor not receiving payments on those Notes.

Why is this prospectus being produced?

Reasons for the offer and use of proceeds: for its general corporate purposes, which include making a profit.

Indication of most material conflicts of interest pertaining to the offer or the admission to trading: Save for the fees payable to the Dealer, acting also as arranger and *Responsabile del Collocamento* and the Distributors and, save for the fact that the Dealer and the Distributors are part of the Issuer's Group, so far as the Issuer is aware, no person involved in the issue of the Notes has an interest material to the offer. Furthermore, UniCredit Bank AG, acting through its Milan Branch, is the Calculation Agent of the Notes and, with regard to trading of the Notes, will act as Liquidity Provider on EuroTLX®. The Dealer, the Distributors and their affiliates have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform other services for, the Issuer and its affiliates in the ordinary course of business.
